INTRODUCTION FOR FUTURE USERS

Deizi.

Kerlenn Pondi's shared calendar: the group's dates, everyone's attendance and all the organisation of each outing, in one place — in each member's language.

WHY DEIZI

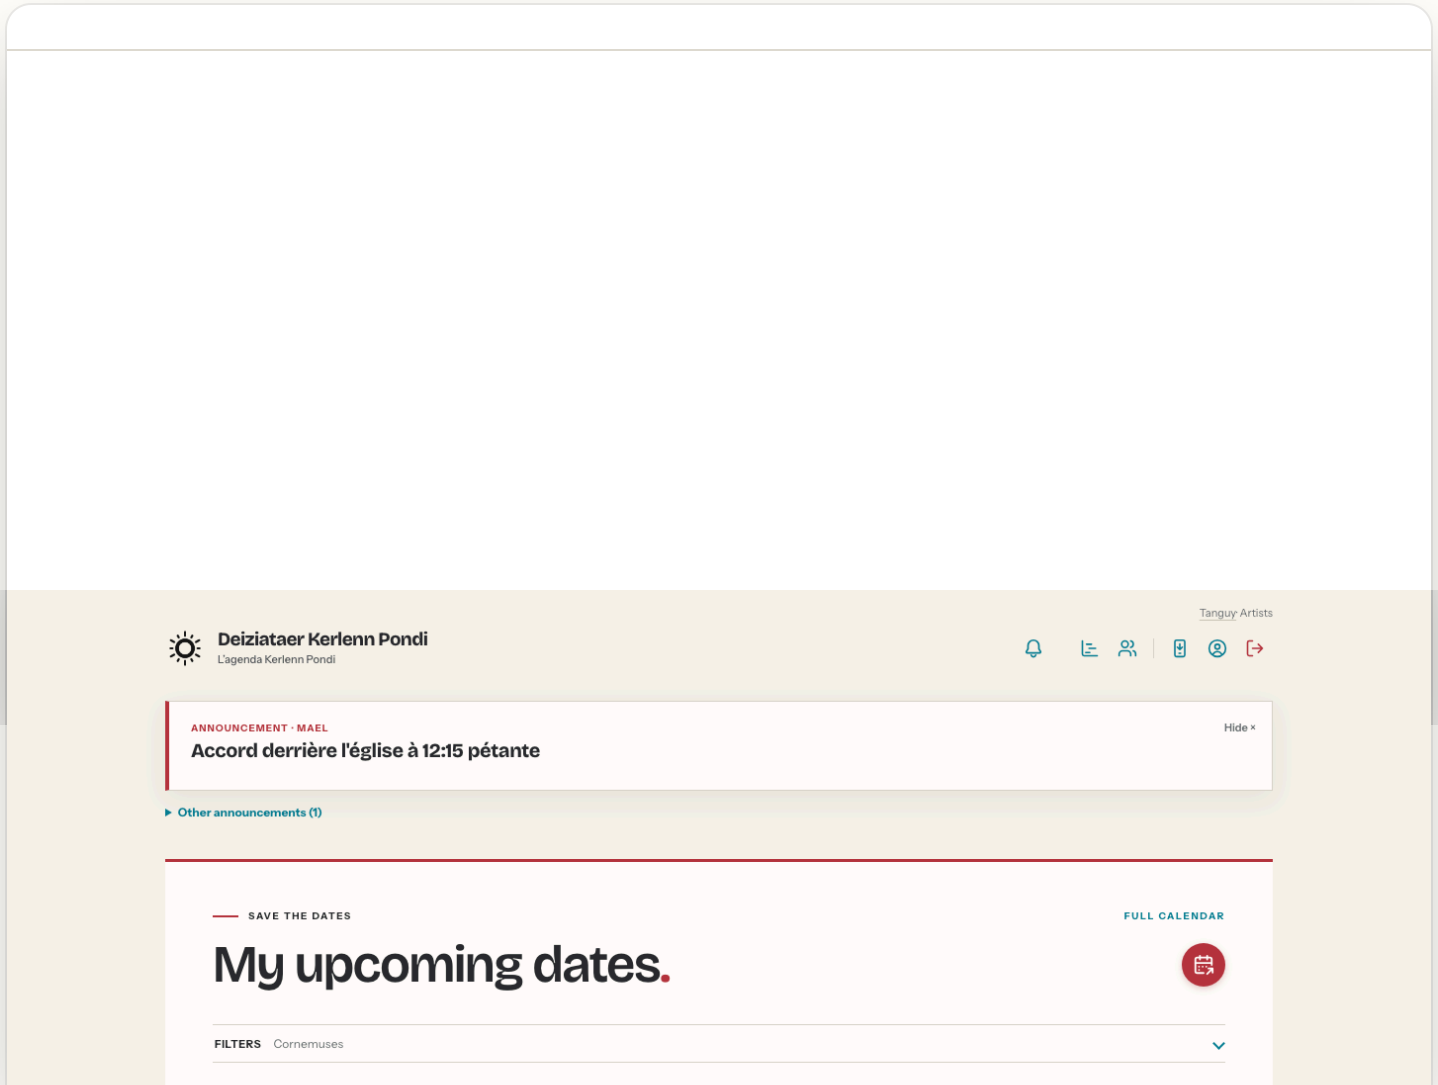

One source for every date.

1. **No more scattered messages**
   Dates, times, places and changes are up to date for everyone.

2. **Attendance in one click**
   Everyone answers; those in charge know straight away who will be there.

3. **Organisation in one place**
   Polls, roadmaps, contracts and quotes follow each date.

4. **In everyone's language**
   French, English, Breton, Spanish: each member picks theirs.

WHO DOES WHAT

Five user levels.

Each level sees and does everything the previous one does, with extra rights.

Artists

See the dates of their sections, answer attendance and polls, open the roadmaps.

All members

Managers

Organise their section's meetings (sectionals, rehearsals), post announcements to it and follow their members' attendance.

Section or desk leaders

Organisers

Prepare the group's outings: all dates, polls, roadmaps; create accounts.

Board, coordination

Logisticians

Handle the paperwork of each date: status, contract, fee, expenses, quotes and a report per season.

Treasury, contracts

Administrators

Configure the application: accounts, sections, statuses, site identity, seasons, languages.

One or two people

Fewer rights — More rights

OUTLINE

One path per level.

Everyone follows the first part; the next ones are for the roles that use them.

01

All members

Logging in, language, calendar, attendance and polls, iCal, phone app, member directory, yearly planner.

02

Managers

Section meetings (sectionals, rehearsals), announcements, photos and logins, attendance grid.

03

Organisers

Polls and their results, roadmaps and public link, accounts, audit log.

04

Logisticians

Logistics status, contract and fee, quotes, report.

05

Administrators

Settings, statuses, languages and translations, member record, rights matrix.

Level 1 · All members

The essentials for everyone.

What every artist uses day to day.

- Log in, choose your language
- Browse the calendar
- Answer: attendance and polls
- Subscribe (iCal), shared links
- Install the app
- Member directory
- Yearly planner

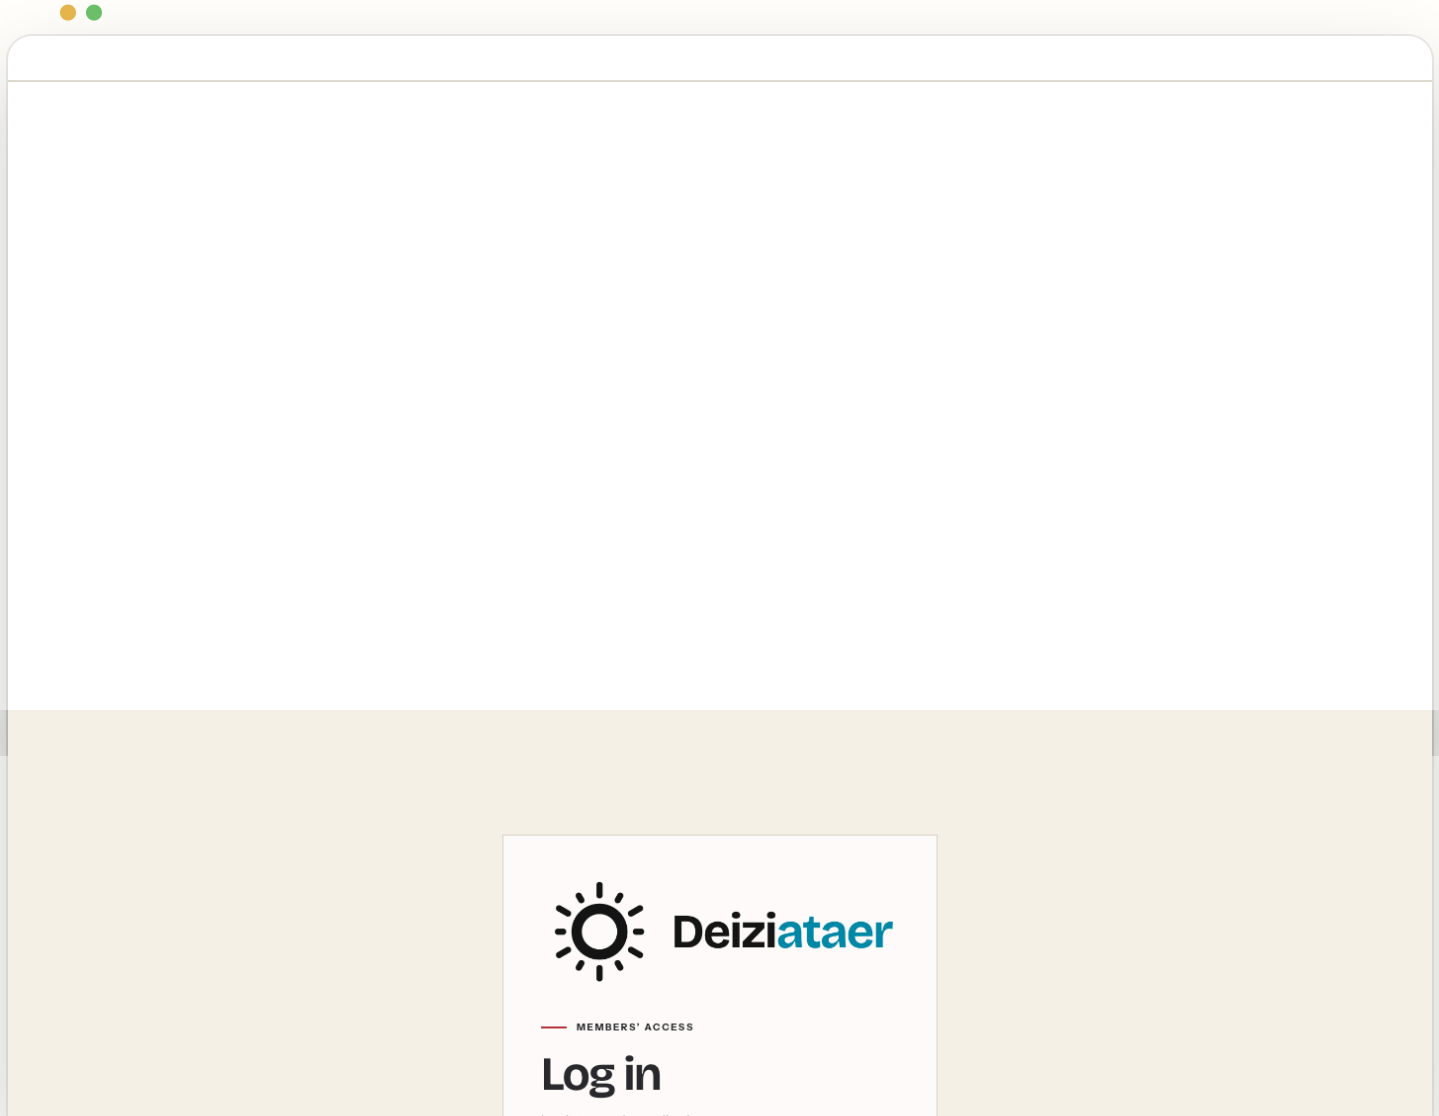

Everyone

Logging in.

1. **Login and password**
   Given by an administrator or an organiser; change them in “My account”.

2. **Capitals and accents**
   “énora” or “ÉNORA”: the login is recognised either way.

3. **Computer or phone**
   The site adapts to the screen, and installs like an app on the phone.

On your phone: tick “Stay logged in on this device” so you don’t have to log in again (90 days). On a shared computer, leave it unticked.

Everyone

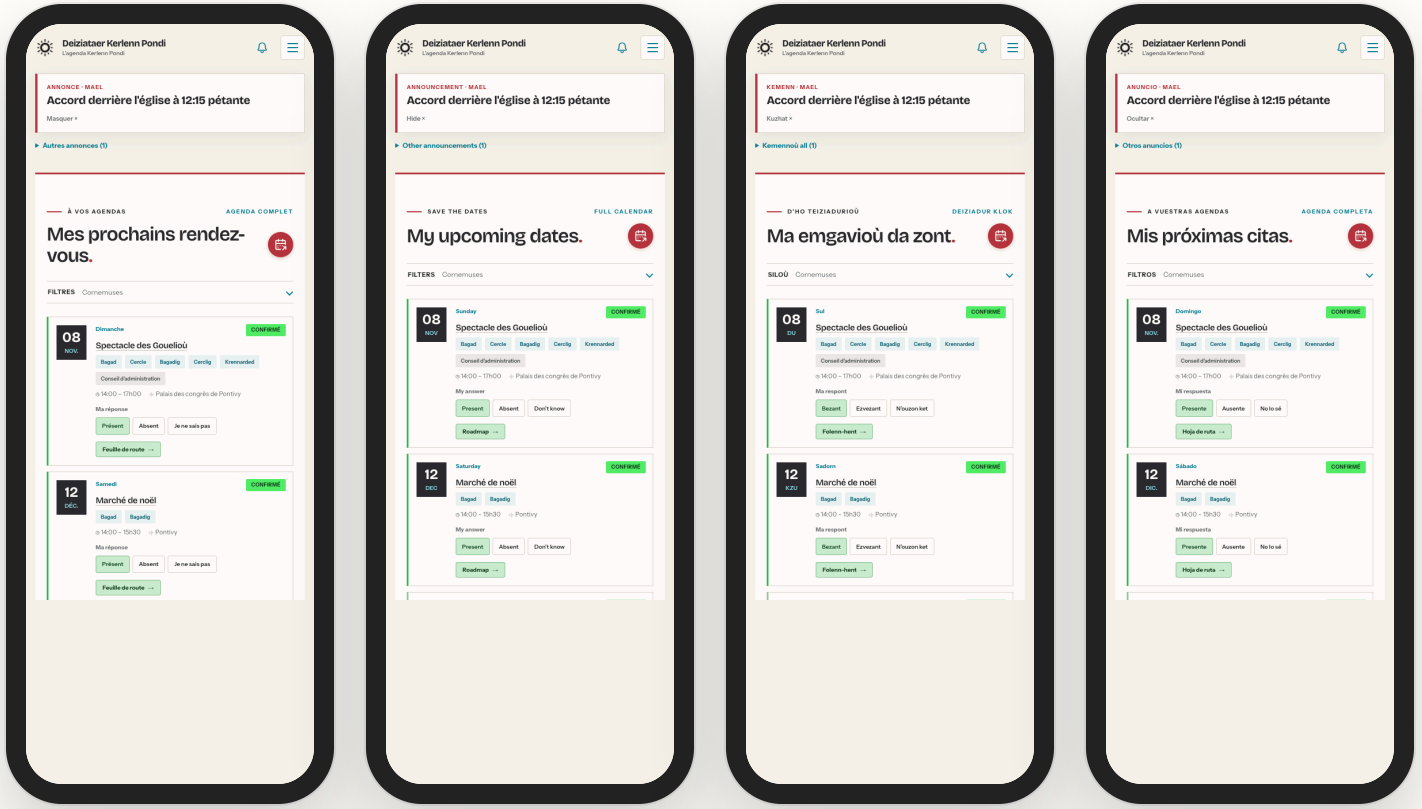

In your language.

1. **Everyone picks their own**
   “My account”, “Language” section: French, English, Breton, Spanish, or a language added by the association. By default, the site’s language.

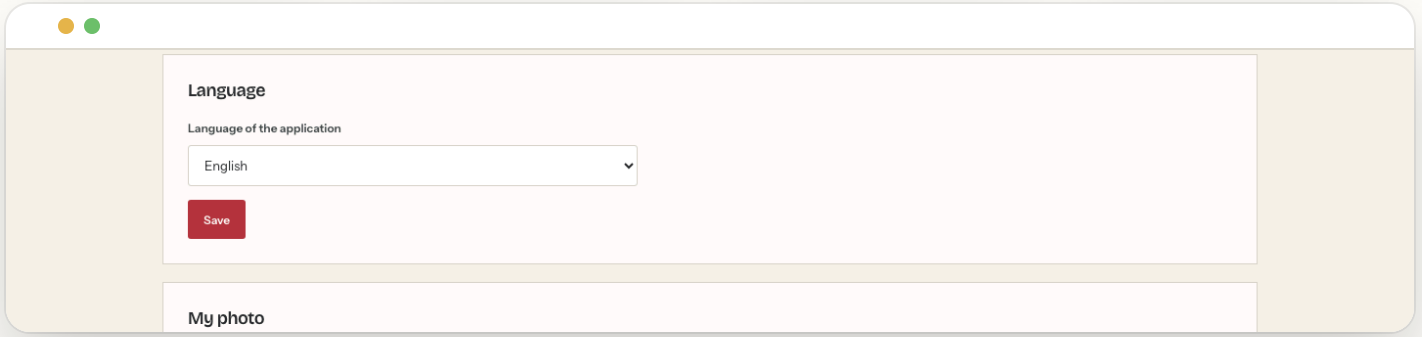

2. **Only the labels change**
   Menus, buttons, messages and dates. The association’s content (date titles, places, announcements, sections) stays as entered.

3. **Statuses too**
   “Confirmé” shows as the association named it, whatever the language.

Your calendar (iCal) follows the chosen language too.

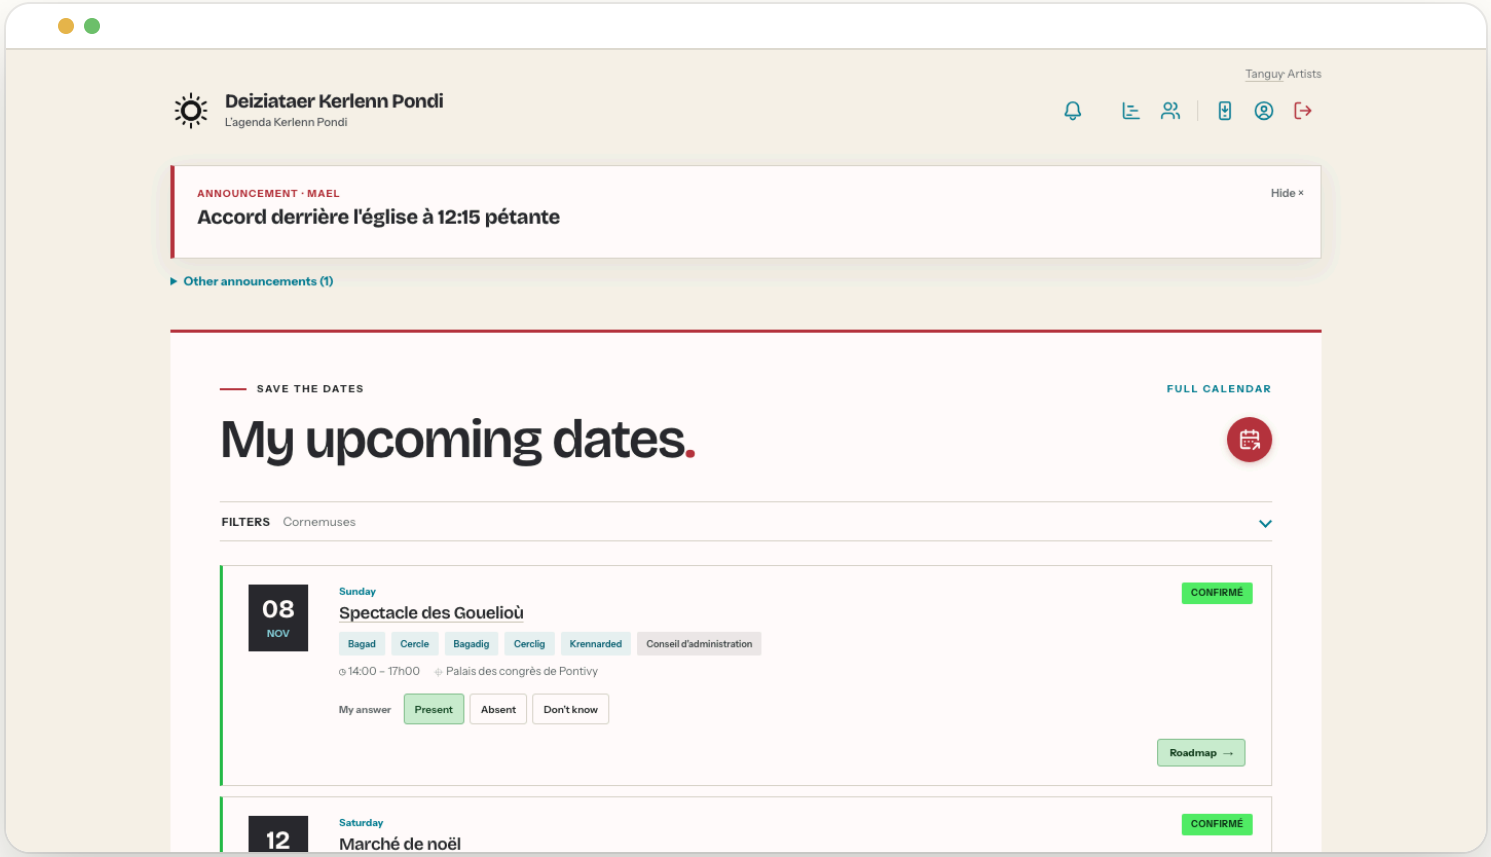

Français English Brezhoneg Español

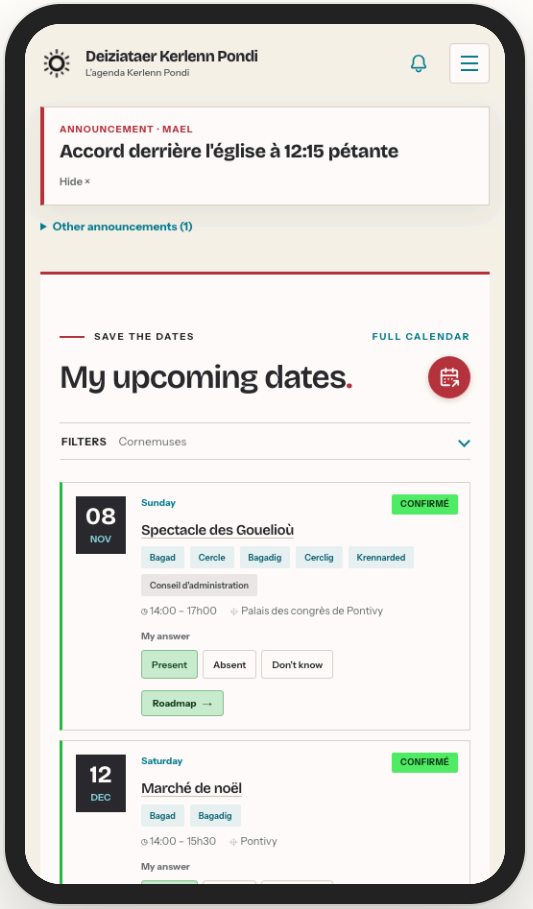

Artists

My sections' calendar.

The next dates of your sections, the latest announcement on top, the filters folded under "Filters". "Full calendar" also shows past dates; the calendar button subscribes your phone (iCal).

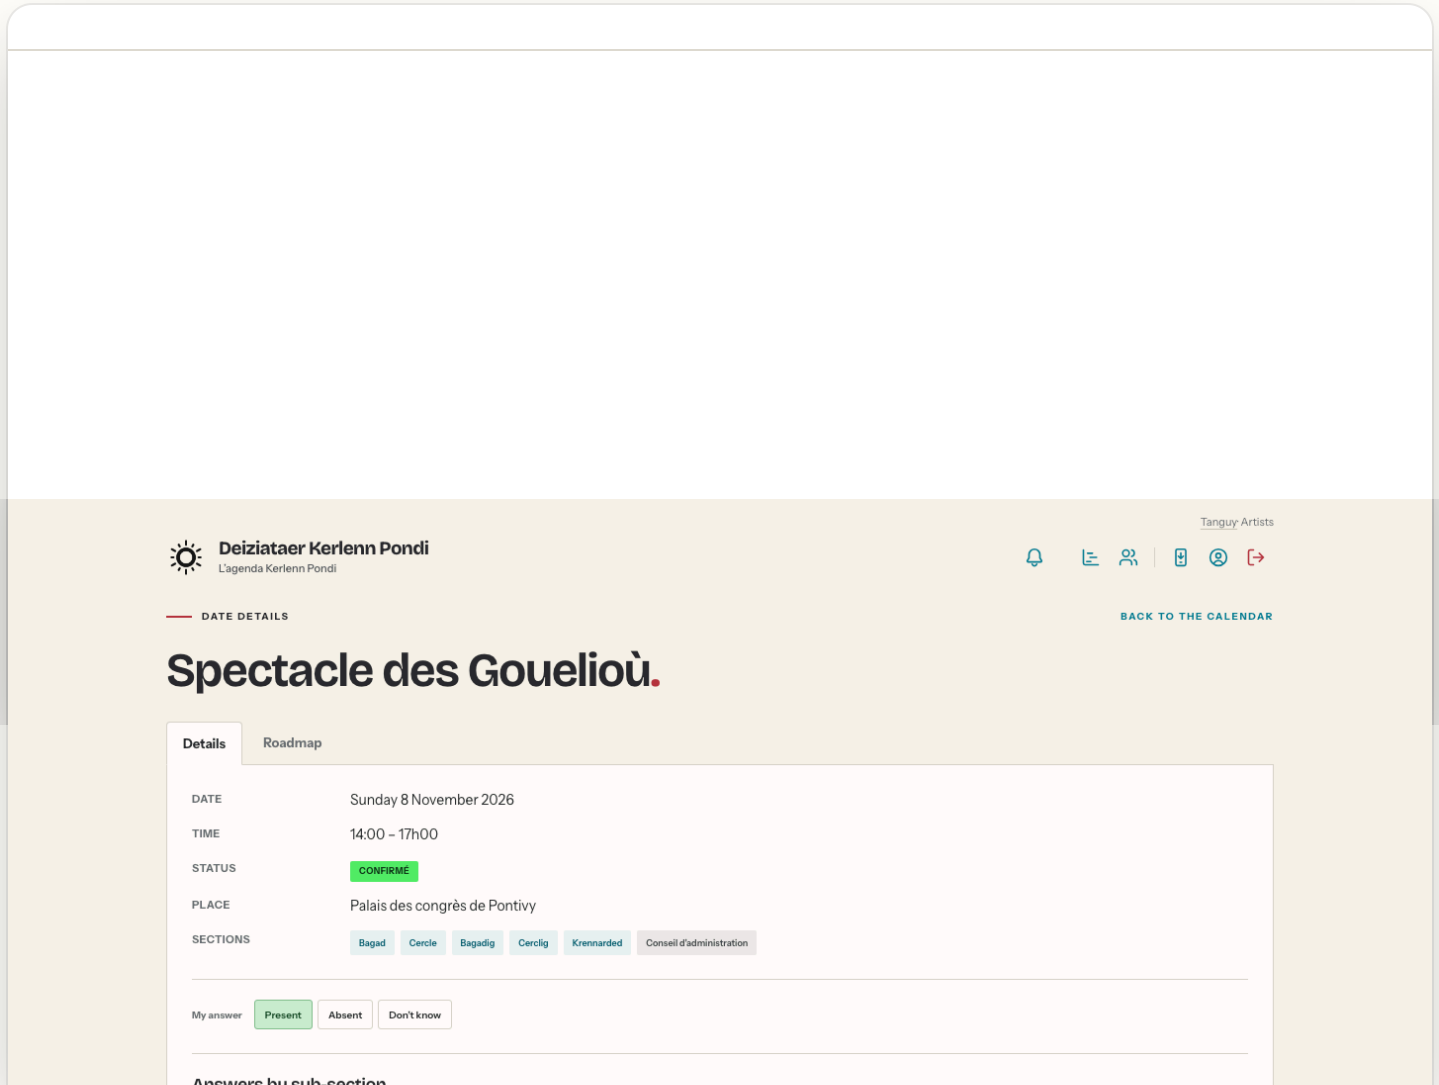

Artists

Answering attendance.

1. **Present, Absent or Don’t know**
   In one click, changeable until the date. Nothing is ticked until you answer.
2. **“My answers”**
   The “No answer” filter finds the dates still to answer.
3. **Who is coming?**
   On the date’s page, the answers of each sub-section and the total of each answer.

On the date’s page: the polls to fill in (red dot) and the roadmap of confirmed dates. “New” and a red badge flag dates created or changed.

Everyone

Share and stay up to date.

One unique link, easy to share

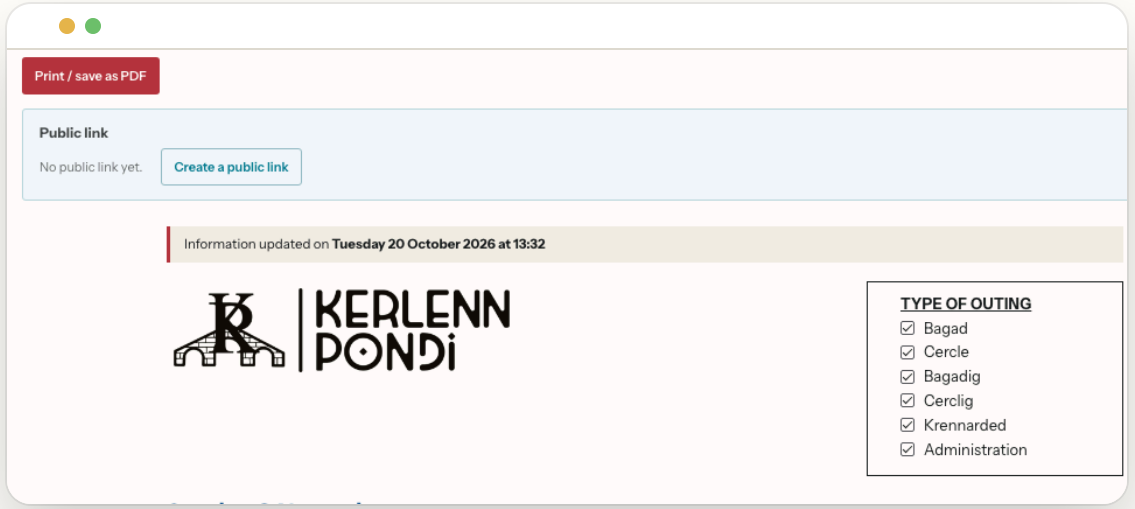

Each **roadmap** and each **quote** has its own address, sent by organisers and logisticians by message or e-mail: anyone can open and print it **without an account** (companions, driver, festival organiser…).

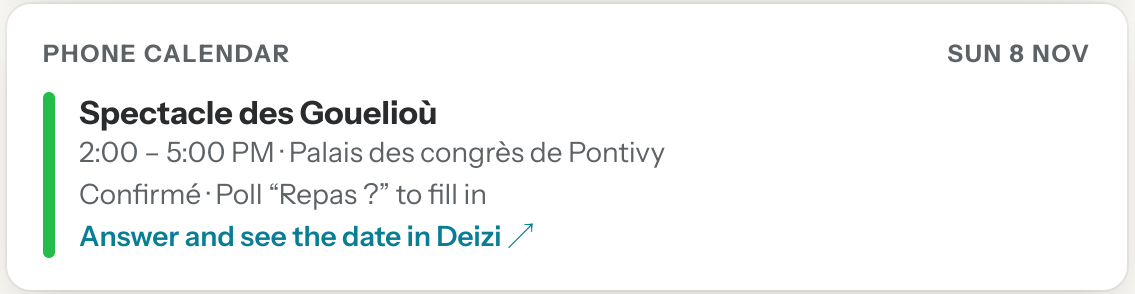

Your calendar on your phone

Subscribe once to your personal iCal calendar: the dates arrive in the phone's calendar and **update by themselves** (time, place, cancellation).

1. Calendar button at the top of the calendar
2. "Subscribe" in the phone's calendar

Each event shows the polls to fill in and the link to the date.

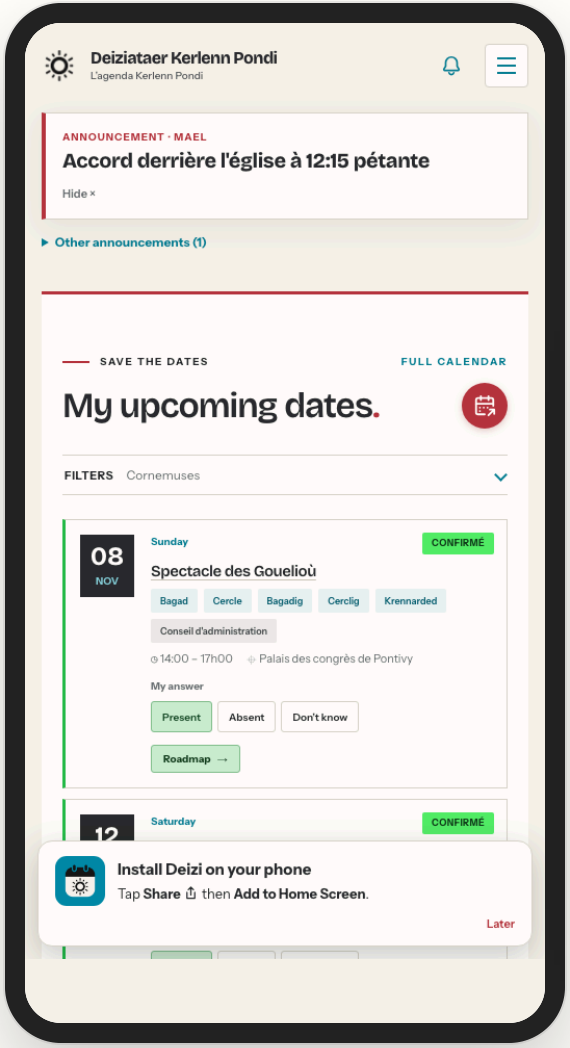

Everyone

Deizi on your phone.

Install Deizi on the home screen: it opens with one tap, full screen, like an app.

1. **iPhone (Safari)**
   Share button, then “Add to Home Screen”.
2. **Android (Chrome)**
   “Install the app” button, or Chrome’s ⋮ menu.
3. **Offered automatically**
   On a phone, the calendar offers it in a banner (“Later” hides it for 30 days); everything is also explained on the About page.
4. **Notifications and bell**
   Turn notifications on from the About page: new date in your sections, a date you opened has changed. Without them, the bell at the top counts them.

The banner offered on the calendar (iPhone)

The icon chosen in Settings (Site identity) joins the home screen, with the number of new items. Tapping a notification opens the date.

On a computer: Chrome or Edge also install Deizi (not Firefox), in the Start menu and the taskbar.

Everyone

The member directory.

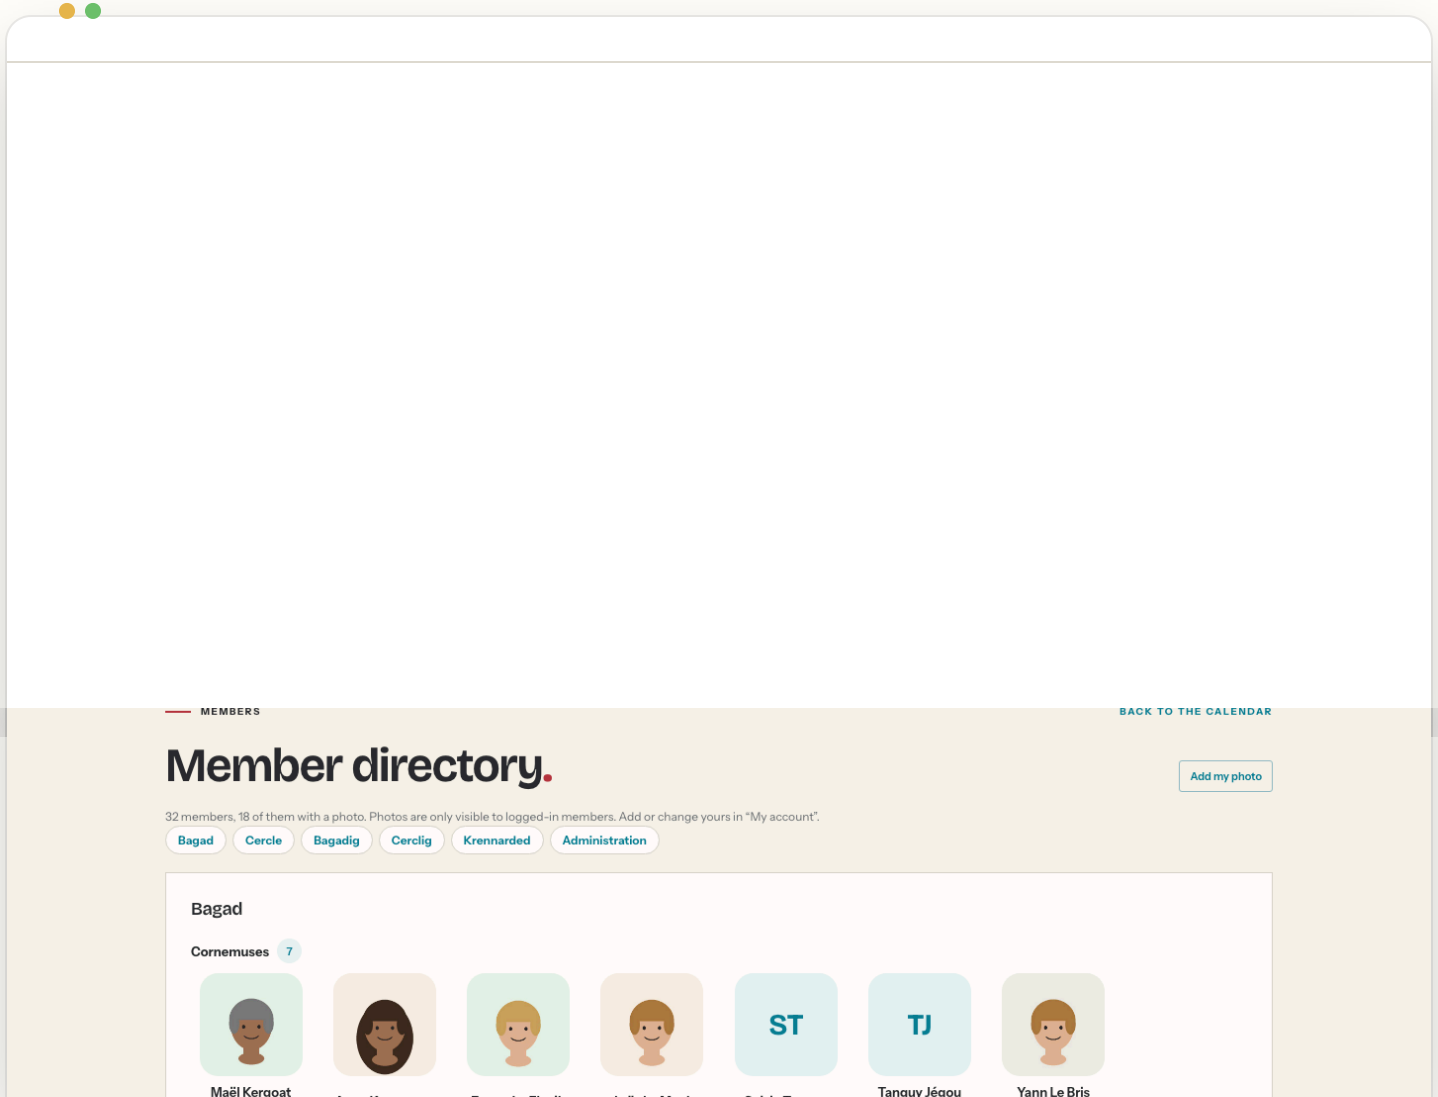

The faces of the group, by branch and sub-section: menu, people icon.

1. **My photo**
   In “My account”, “My photo” section (JPEG or PNG). Frame the face at the top of the picture.

2. **Thumbnail and portrait**
   A square thumbnail with rounded corners; a click enlarges it as a portrait.

3. **Titles and leads**
   Under the name, the role in the association (“Penn-soner”, “Secrétaire”: entered by the association, so not translated); the section lead comes first in their sub-section.

Among us: photos are only visible to logged-in members.

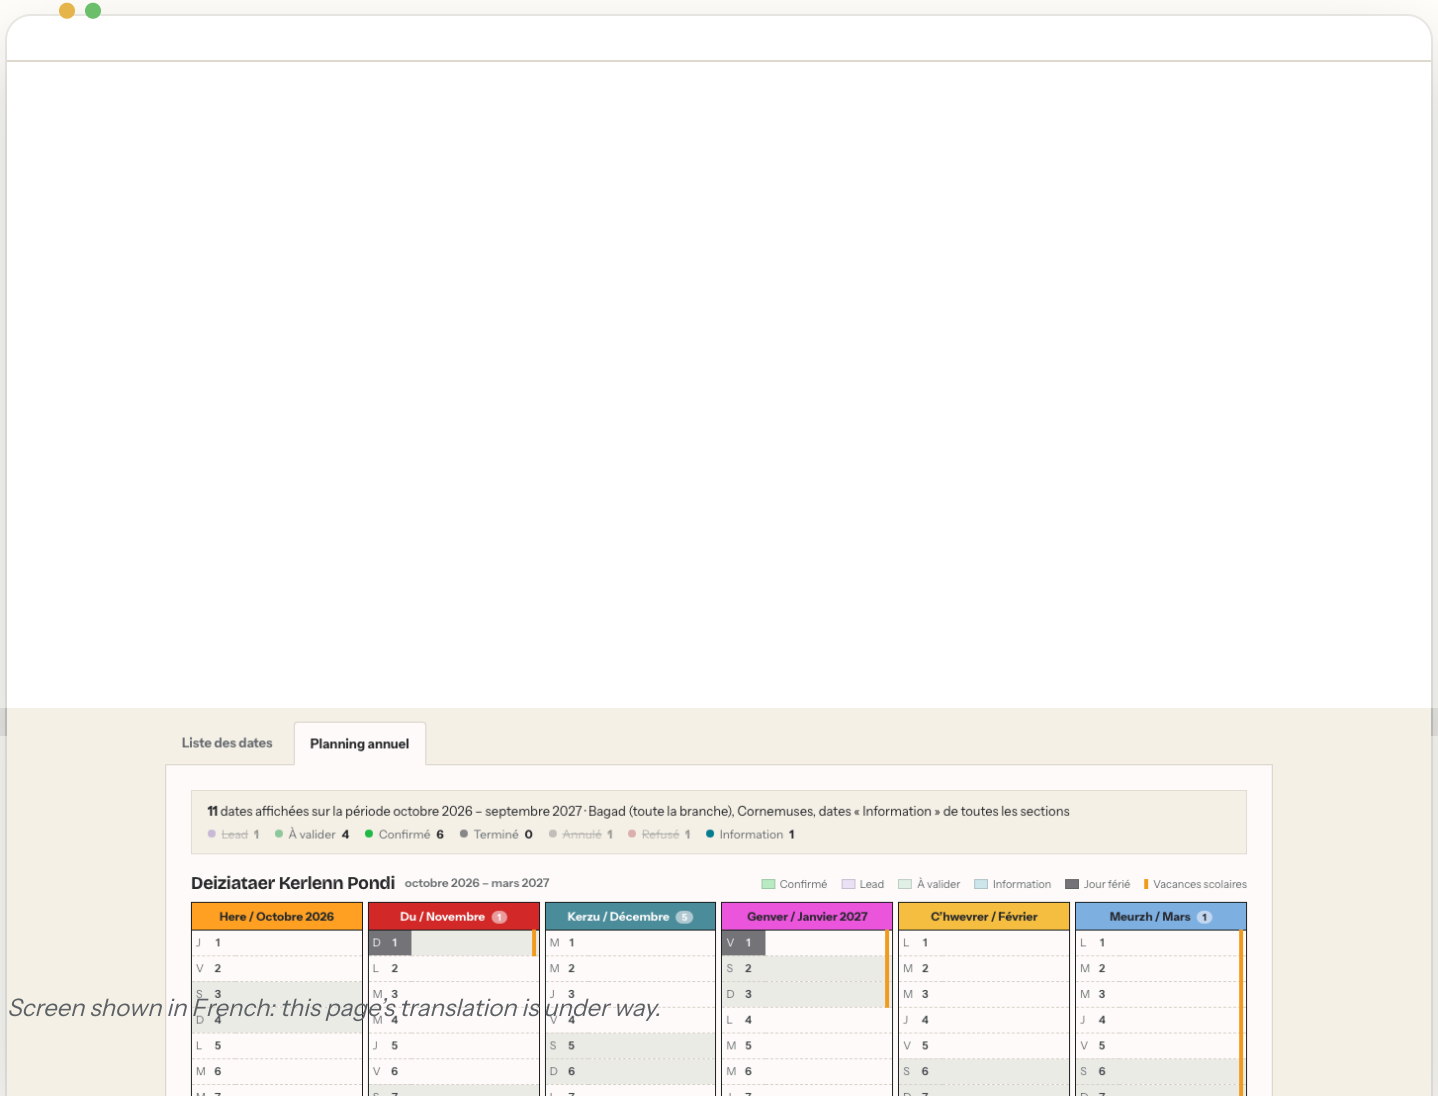

Artists

The yearly planner.

1. **The whole season at a glance**
   One month per column, each date in its status colour, with the section codes.
2. **Bank and school holidays**
   Shown in the planner to anticipate availability.
3. **Filters and printing**
   By section and status; one half-year per landscape page.

“Views” menu (planner icon): “Date list” and “Yearly planner” tabs.

Screen shown in French: this page's translation is under way.

Level 2 · Managers

Bringing a section to life.

The section’s internal meetings, outside performances and logistics.

The management screens that follow are shown in French: their translation is under way.

- Sectionals
- Sub-section rehearsals
- Announcements to the section
- Photos and logins
- Attendance grid

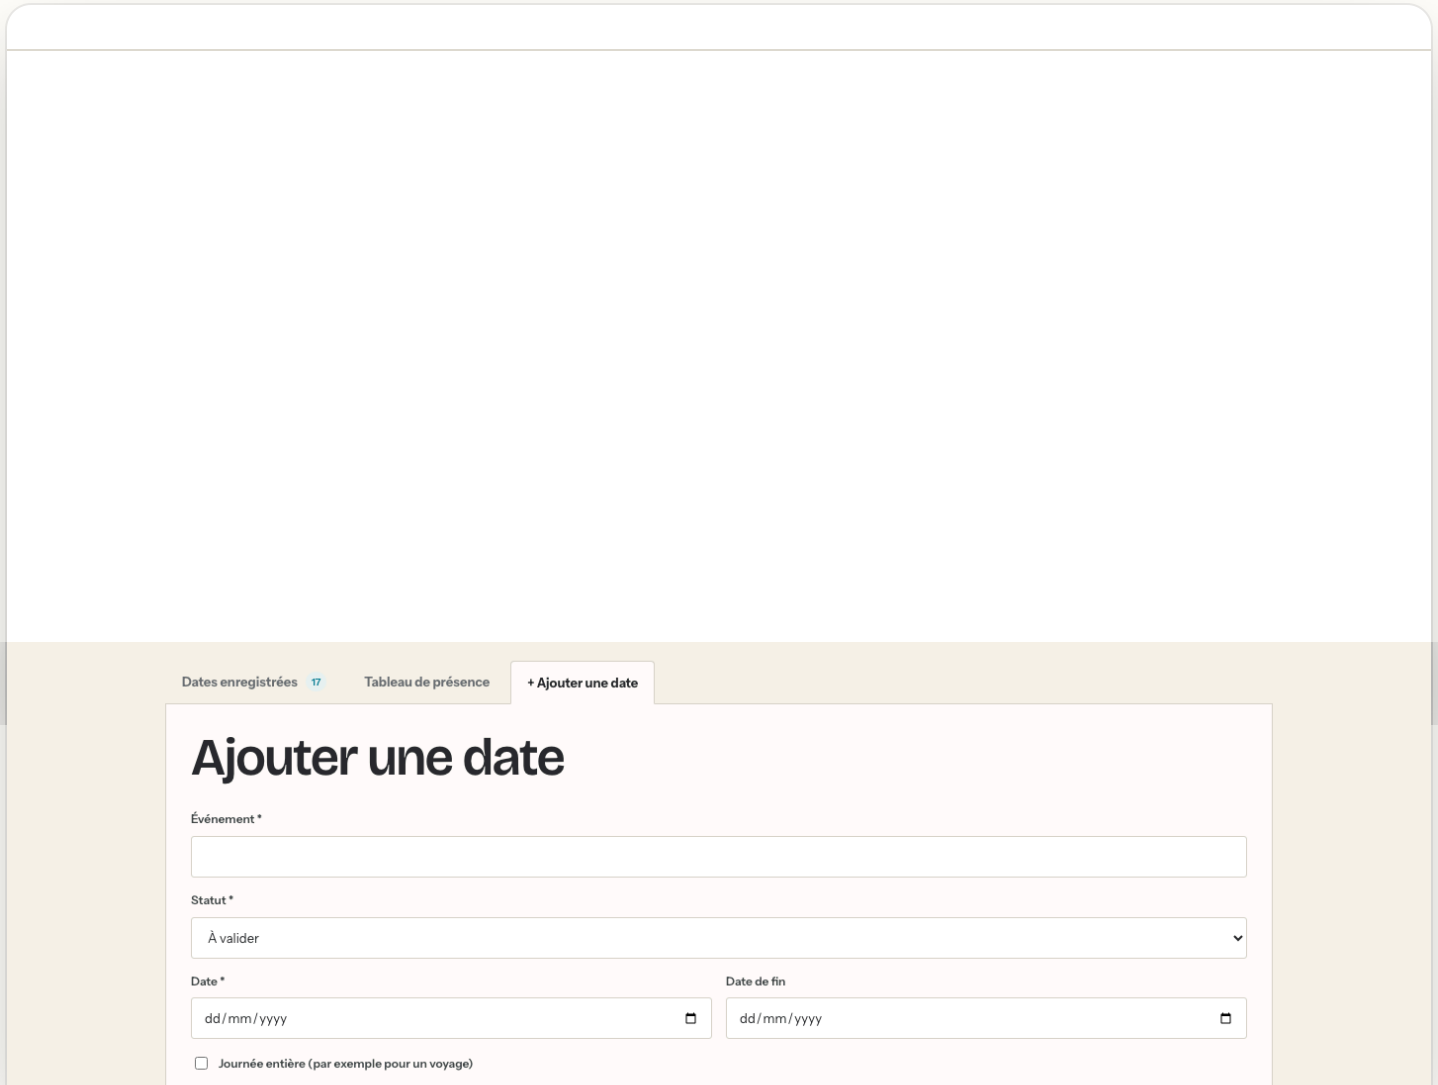

Managers

My section's meetings.

The manager creates the internal meetings of their sub-sections, without going through the organisers.

1. **Sectional**
   "Stage cornemuses", "Stage Pipe Band": sections involved, time, place, comment.
2. **Sub-section rehearsal**
   A date reserved to the members concerned: other sections don't see it.
3. **Outside logistics**
   No contract or quote: these dates stay out of the logistics follow-up.

Then: everyone answers from the calendar, and the manager follows attendance in the grid.

Managers

Announcements to my section.

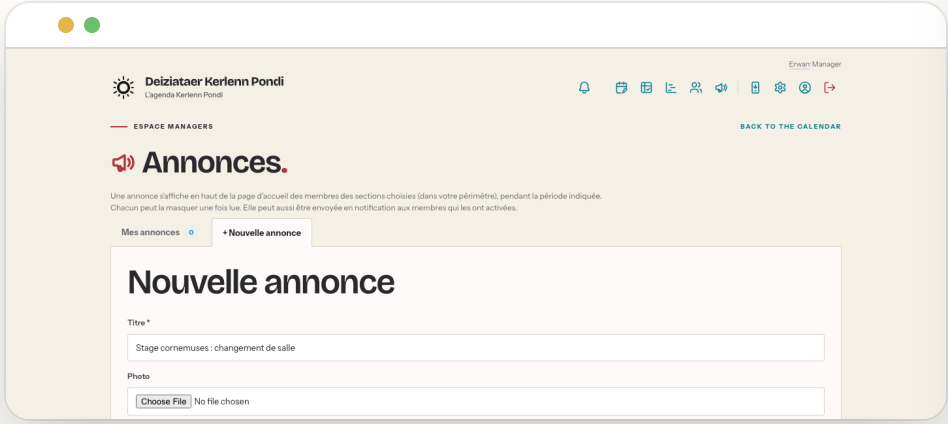

A message for all members of their sub-sections, at the top of their home page.

1. **Title, text, link and photo**
   A change of venue, gear to bring, a reminder before a sectional.

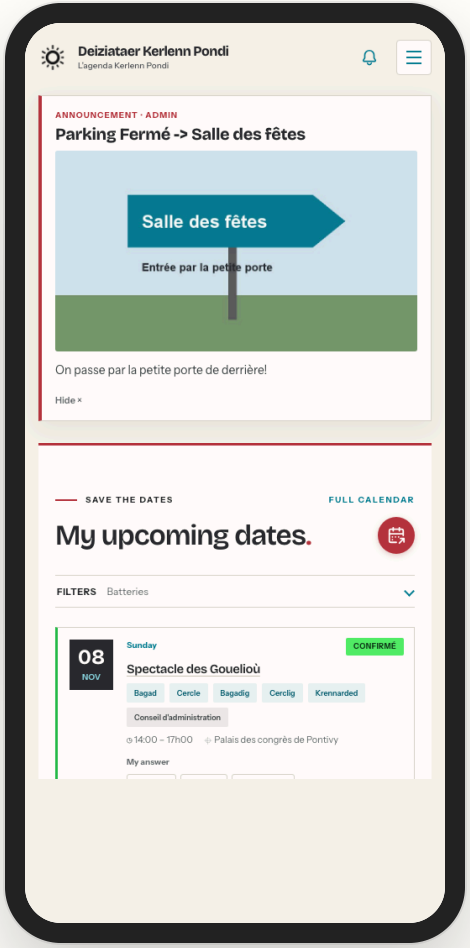

2. **The right audience, the right time**
   The sub-sections in their scope, during the chosen period.

3. **Home page and notification**
   The latest announcement shows above the next dates and goes out as a notification to those who turned them on.

“Announcements” menu (megaphone): “My announcements” to edit or delete. Everyone can hide an announcement once read.

The manager’s form: title, photo, notification. Text, link, period and audience are folded; by default, all sub-sections in their scope.

On a member’s phone, at the top of the home page

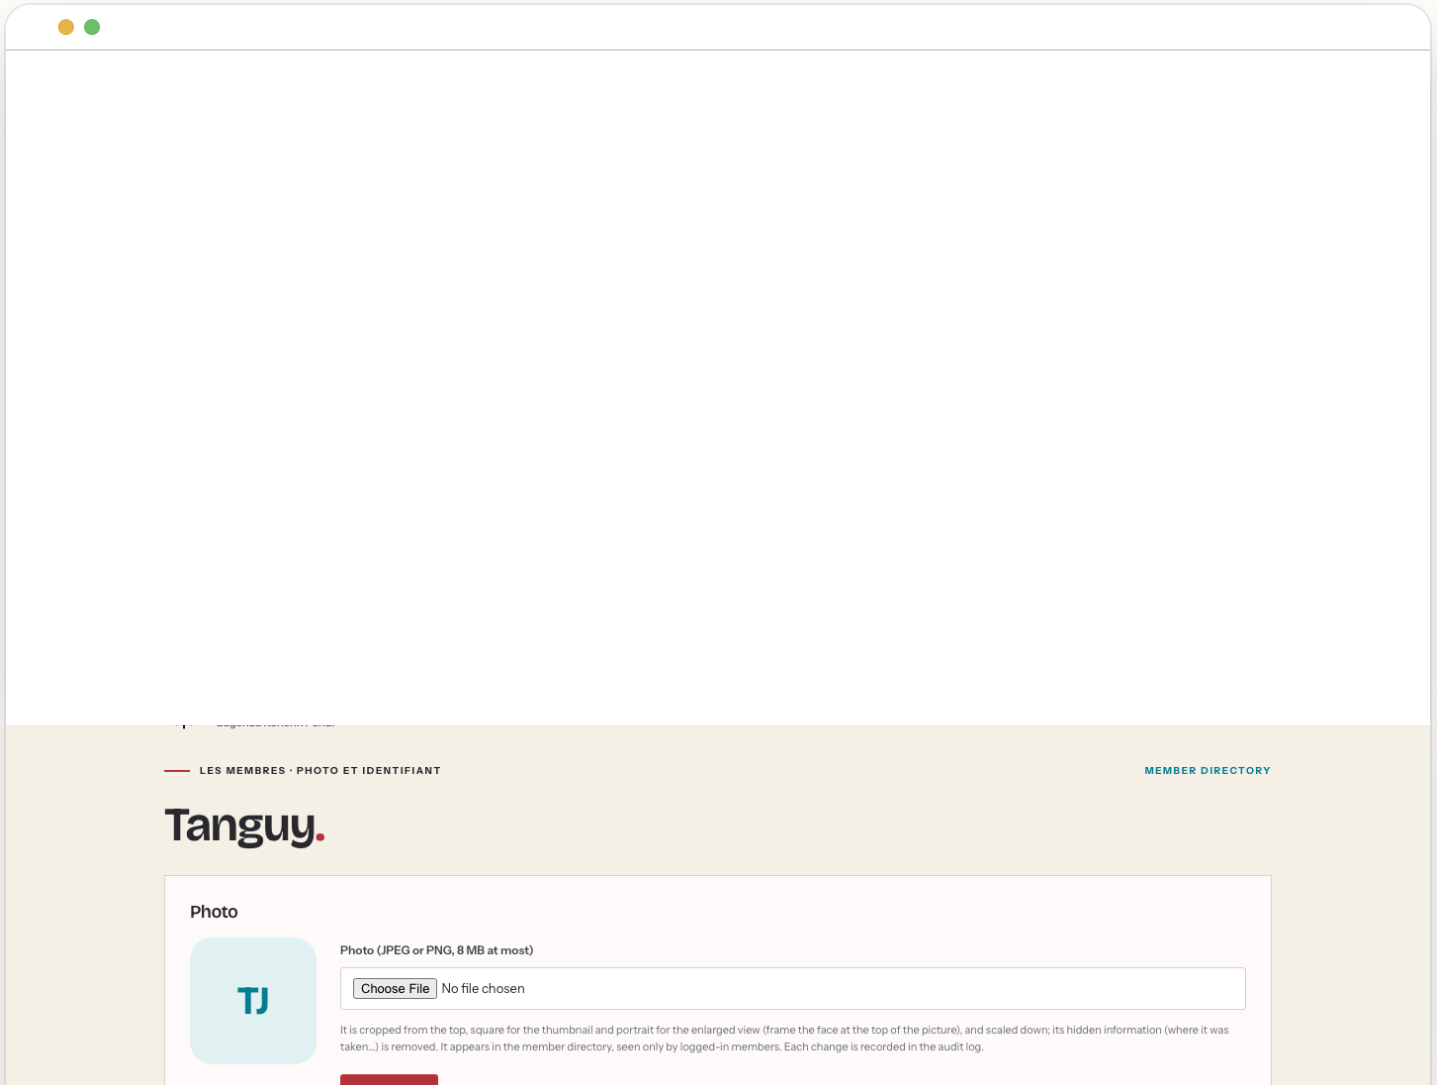

Managers

Photos and logins.

The manager helps the members in their scope complete the member directory.

1. **“Edit” in the member directory**
   Under each artist or manager of their sub-sections, and under their own photo.
2. **Photo and login**
   A reduced record: change or remove the photo, change the login (the password stays the same).
3. **Everything is traced**
   Each change is written to the audit log, with its author.

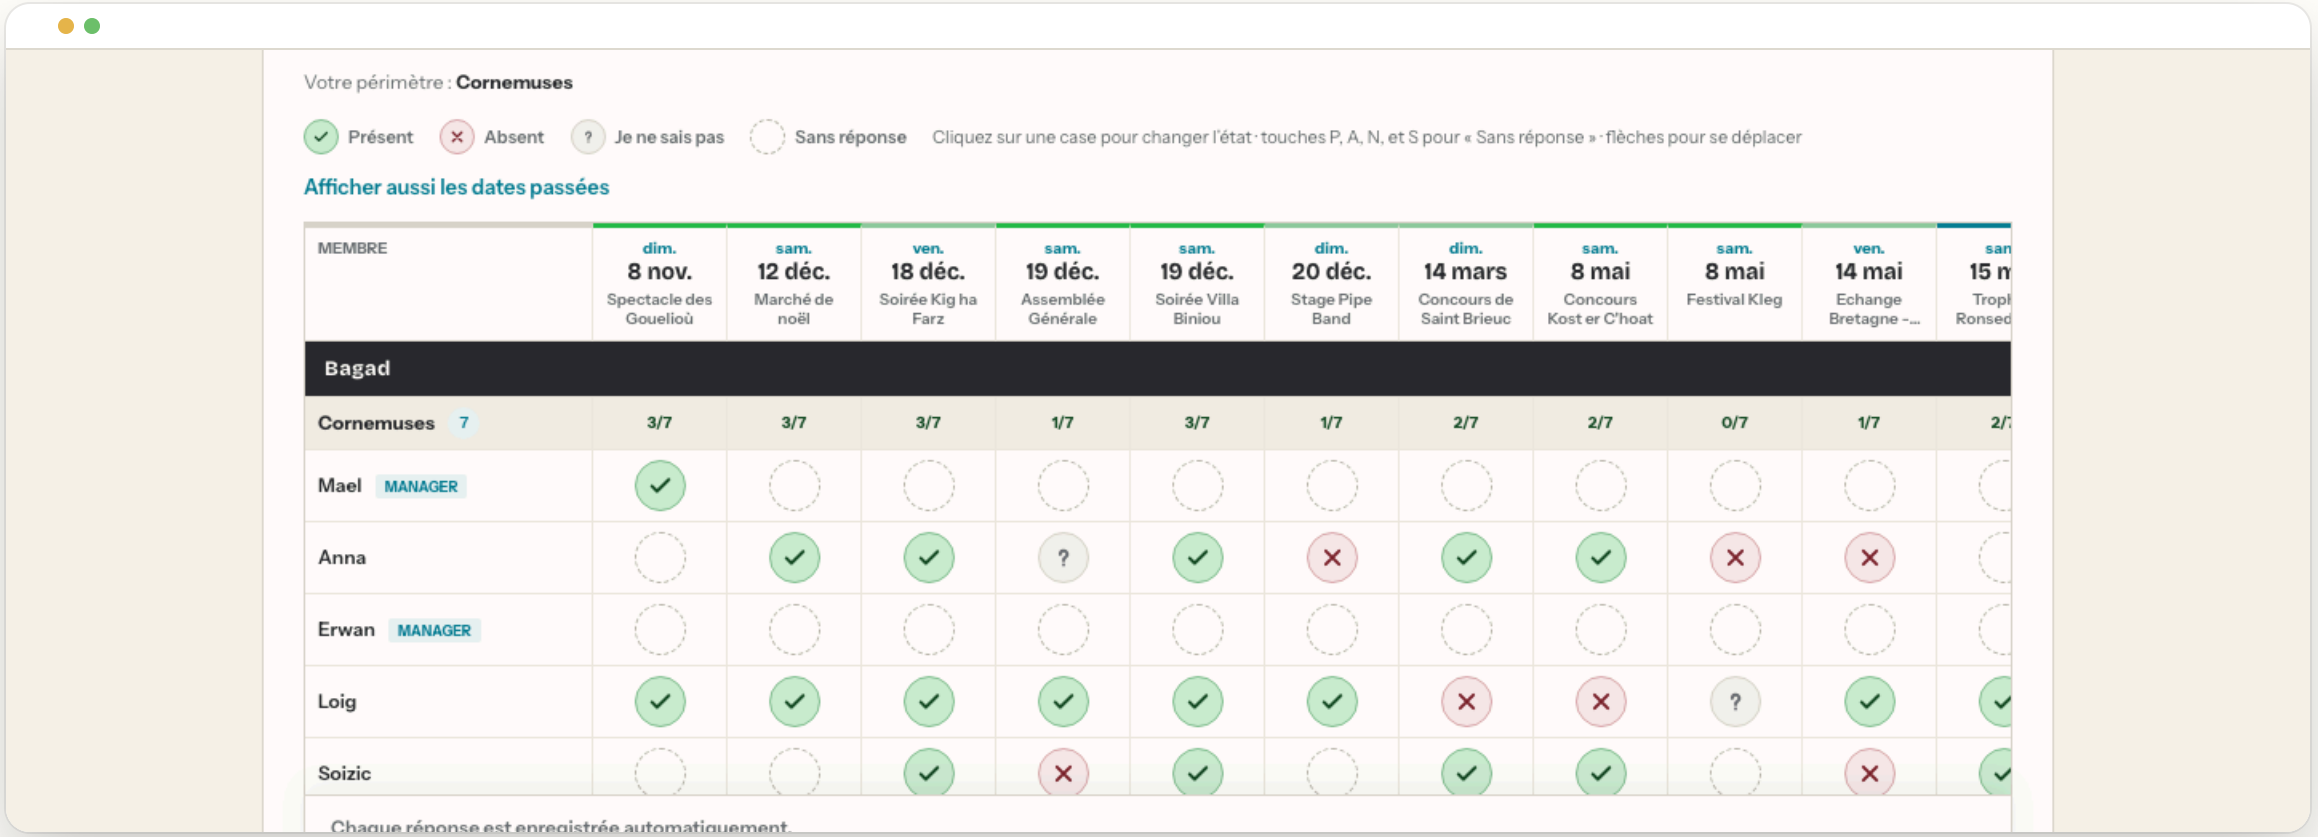

Remember to tell the member their new login: it is what they will log in with.

Managers

The attendance grid.

Members in rows, dates in columns. A click moves an empty cell to Present, Absent, Don’t know, then back to No answer (keys P, A, N, S); everything is saved automatically.

Level 3 · Organisers

Preparing the outings.

All the group's dates, and the tools to organise each outing.

- Polls (meal, coach…)
- Roadmaps and public link
- Accounts and audit log

Organisers

Polls.

1 **Create**

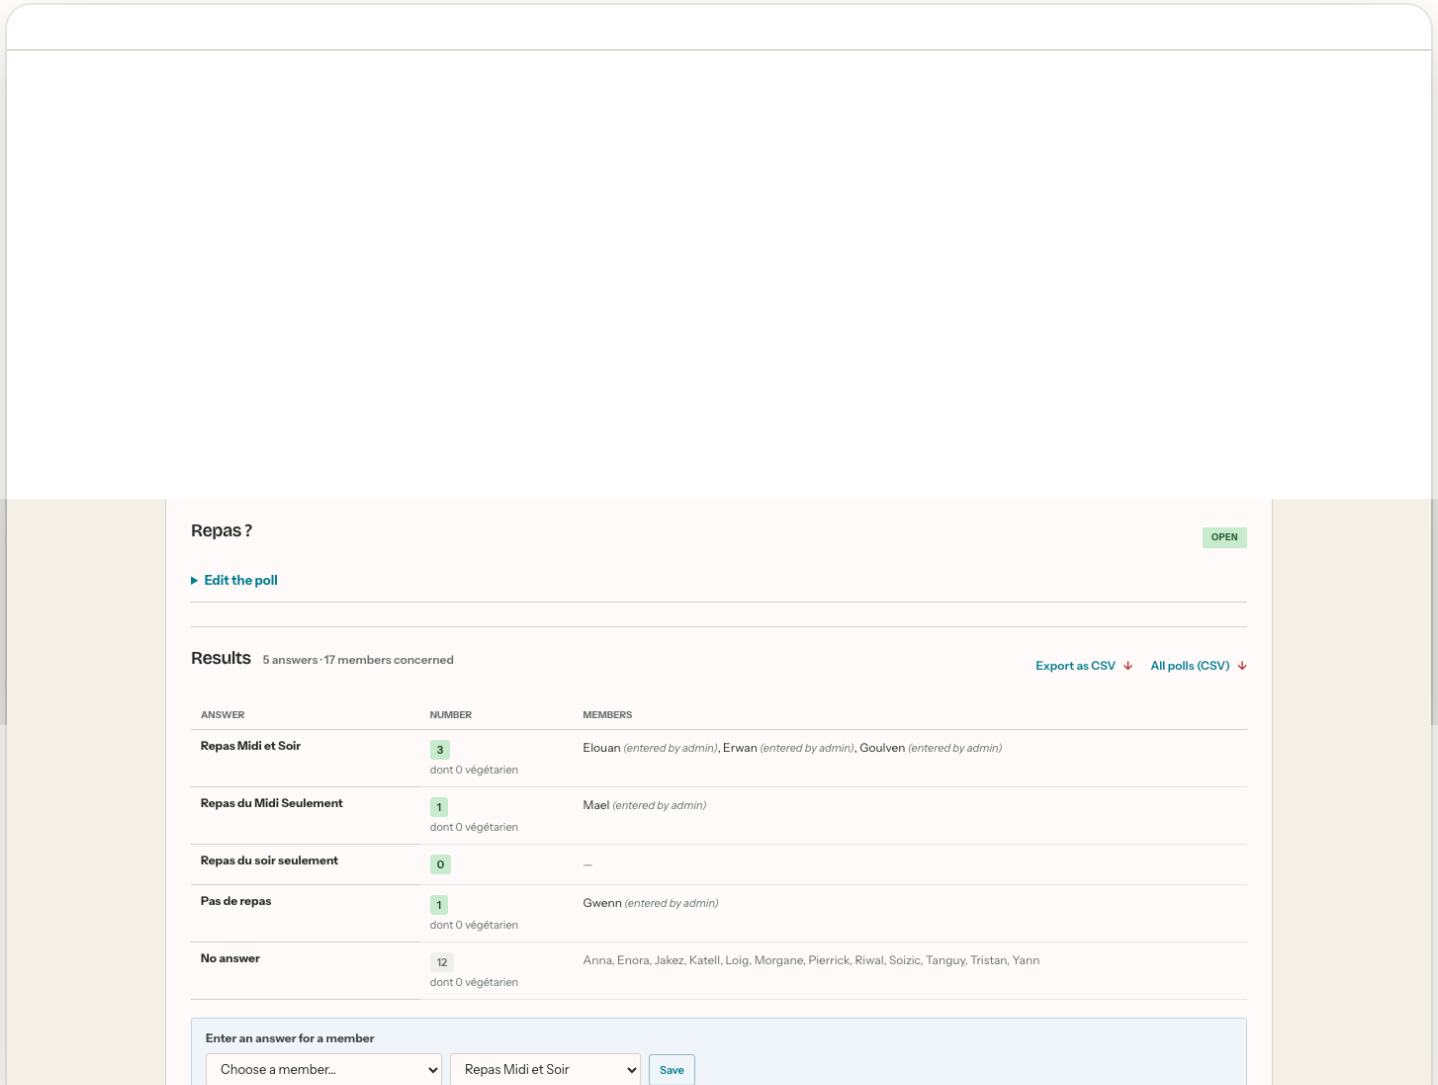

The date's "+ Poll" tab: a question (meal, coach…) and its answers.

2 **Follow the answers**

Count and names per answer, members without an answer, vegetarian diet or minors if needed.

3 **Detailed table**

One row per member, filterable, with totals; printable and exportable as CSV.

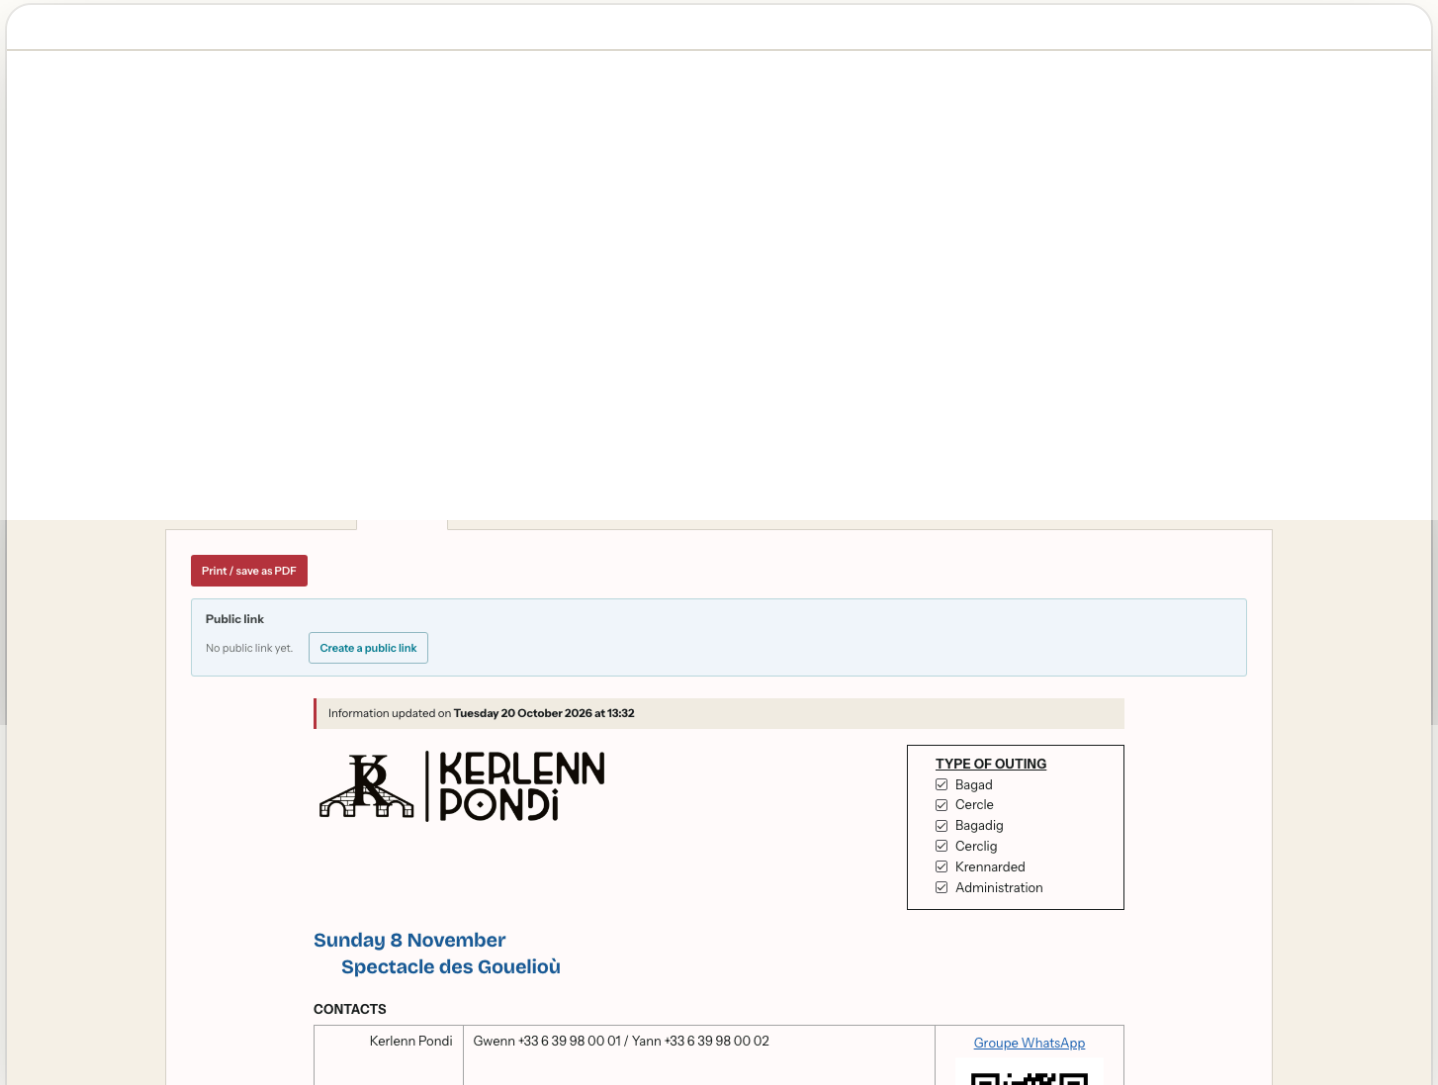

For a member: the organiser can enter their answer on their behalf (shown as "entered by …").

Organisers

The roadmap.

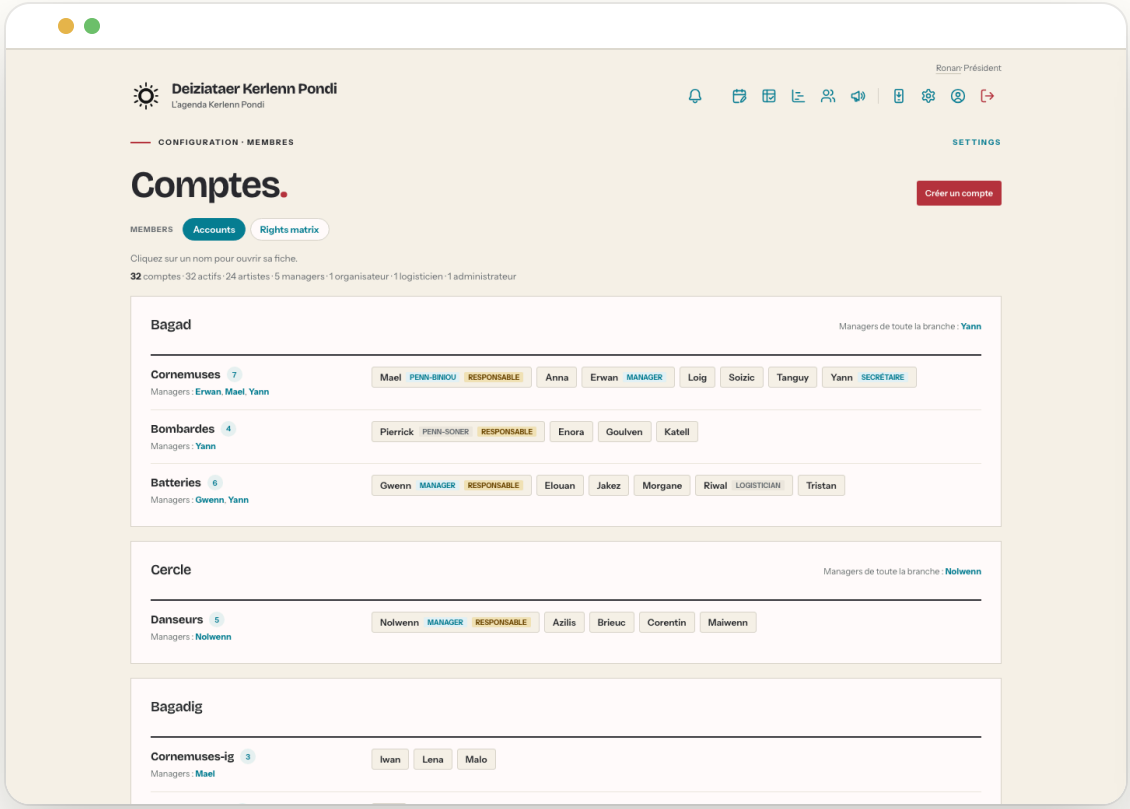

1. **Filled in with the date**
   Contacts, place, transport, meal, outfit, repertoire, schedule, and documents (access map, organiser's roadmap…) as a link or PDF.
2. **Visible to members**
   As soon as the date is confirmed; printable as PDF.
3. **One unique public link**
   To copy and send (companions, driver…); can be renewed or turned off.

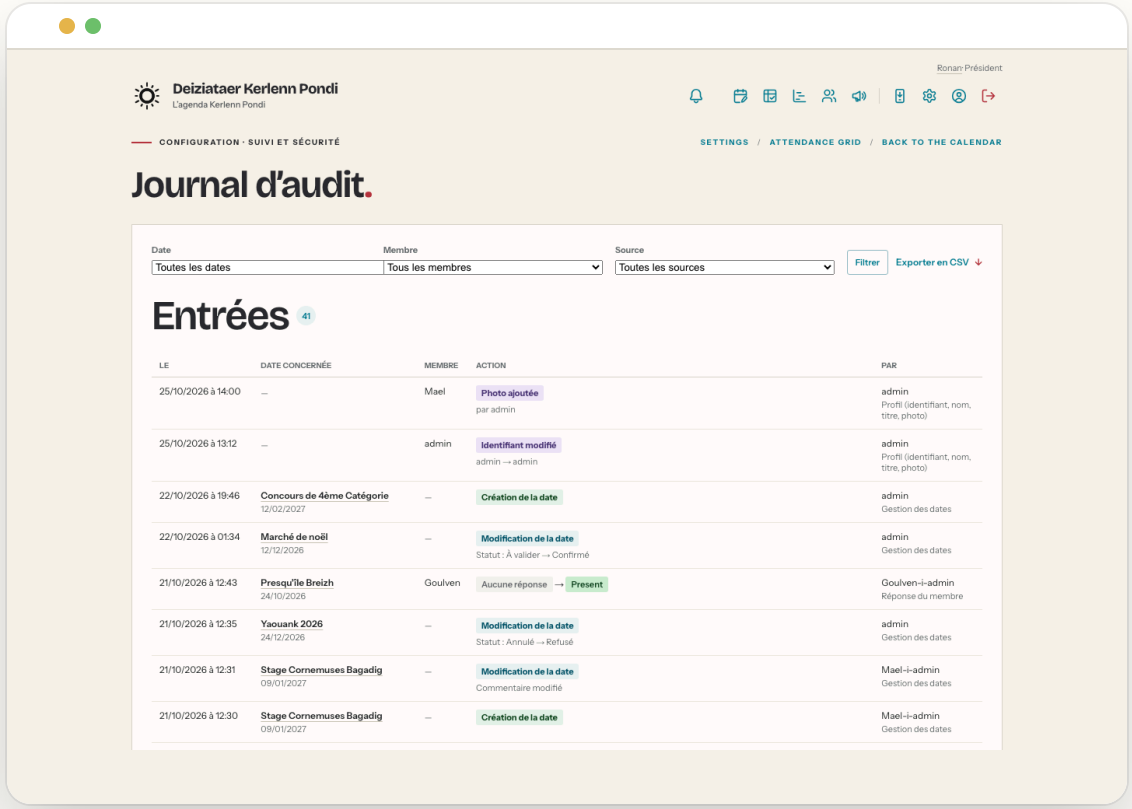

In iCal: the notes and the roadmap link also reach the phone's calendar.

Organisers

Accounts and audit log.

Accounts — by branch and sub-section, the lead first; creating artist and manager accounts, sections, scope and login.

Audit log — logins, answers entered, dates changed, profile changes (login, name, title, photo): who, what, when; CSV export. Recorded in English, whatever the author's language.

Level 4 · Logisticians

The paperwork.

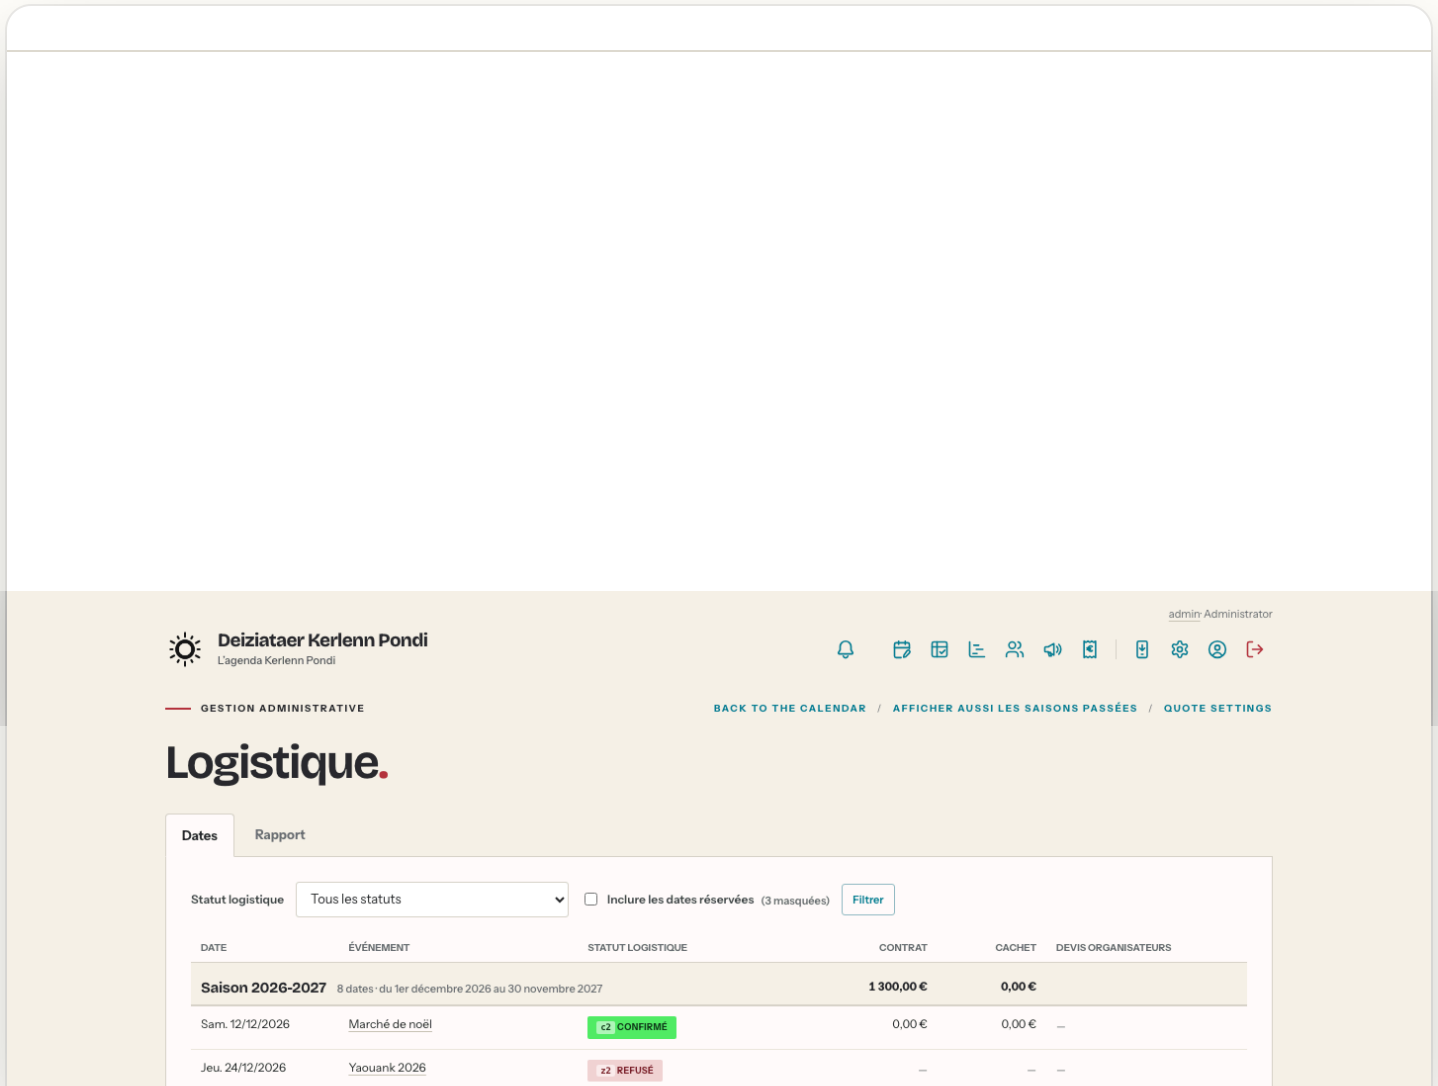

The Logistics page, for logisticians and administrators.

- Logistics status
- Contract, expenses and fee
- Organiser quotes and extras
- Report per season

Logisticians

Dates, season by season.

1. **Logistics status**
   Finer than the calendar's (quote to send, awaiting contract, to invoice…), it sets the status members see.
2. **Totals per season**
   Contracts and fees, latest season first.
3. **Logistics follow-up**
   Only dates ticked "Logistics follow-up" appear.

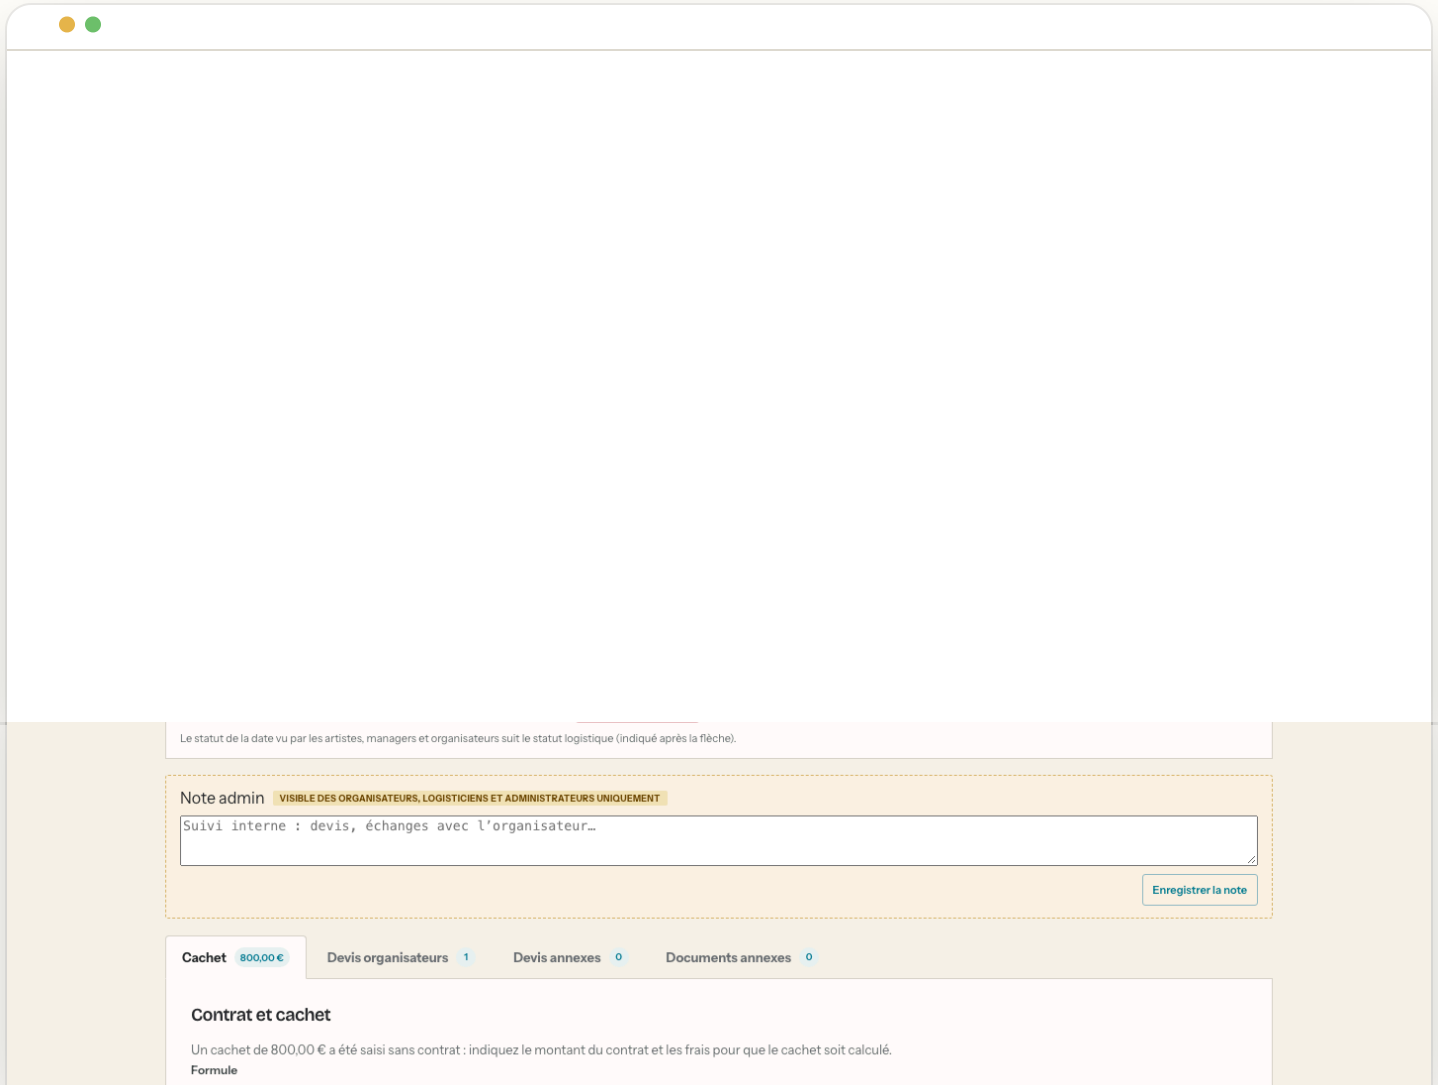

Logisticians

Contract, expenses and fee.

For each date, choose the formula and enter the contract and expenses: the fee is calculated automatically.

Contract − **Expenses** = **Fee**

1. **Formula**
   “Bagad seul”, “Bagad & Cercle”… for the report.
2. **Admin note**
   Internal follow-up, shared with the organisers.
3. **Attached documents**
   Links to the contract and other papers, listed under the date’s admin note.

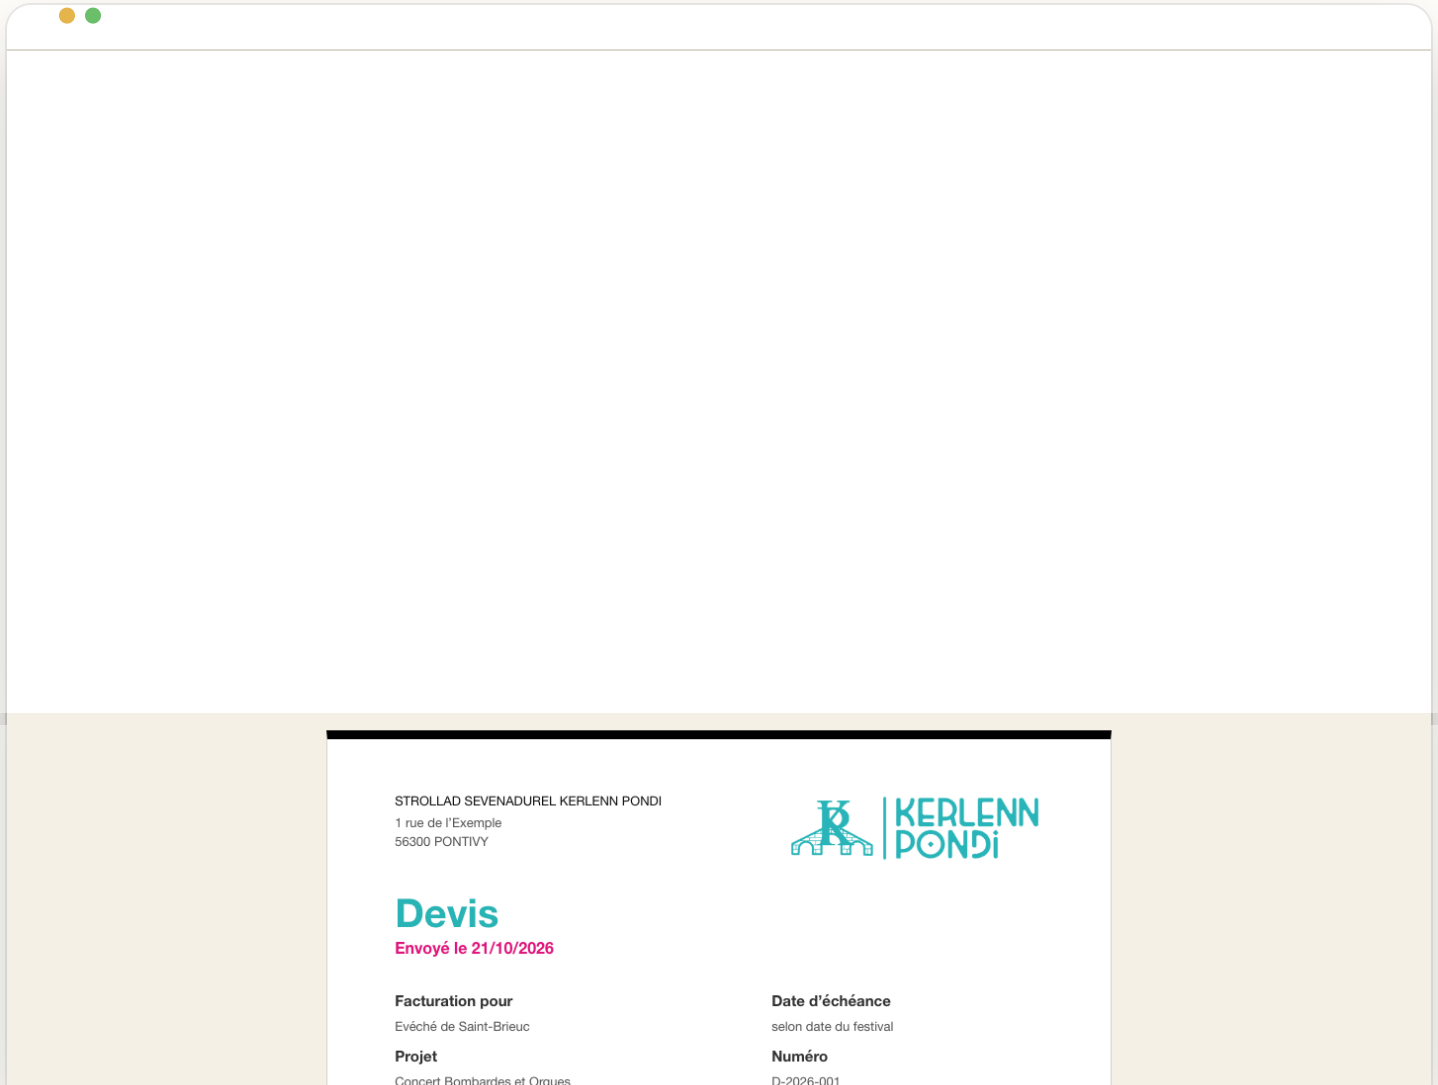

Logisticians

Quotes ready to send.

The organiser quote offers one or more options, each with its lines. A unique public link sends it to the organiser, who prints it without an account.

Draft → Published → Accepted or Refused

Published = frozen: to change it, withdraw the link and publish again (a new link is created). Extra quotes (transport, accommodation…) are filed by need.

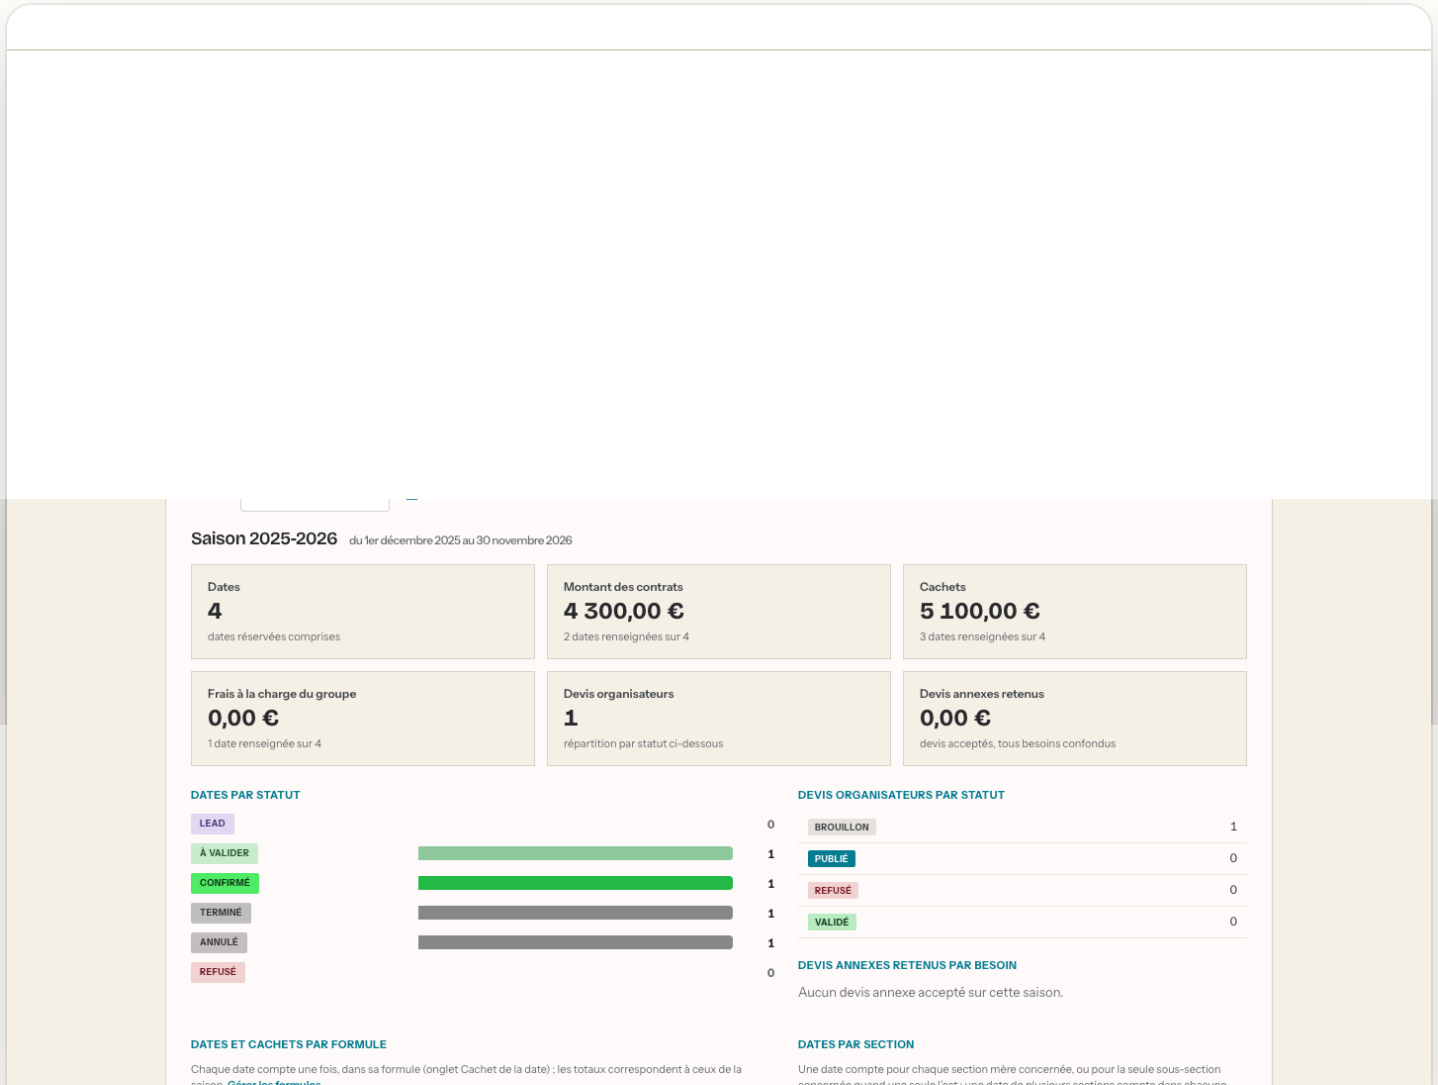

Logisticians

The season report.

1. **Key figures**
   Dates, contracts, fees, expenses, quotes.
2. **Breakdowns**
   By status, by formula (fees included), by section.
3. **Month by month**
   With the season's totals.

Season: its start day is set in Settings.

Level 5 · Administrators

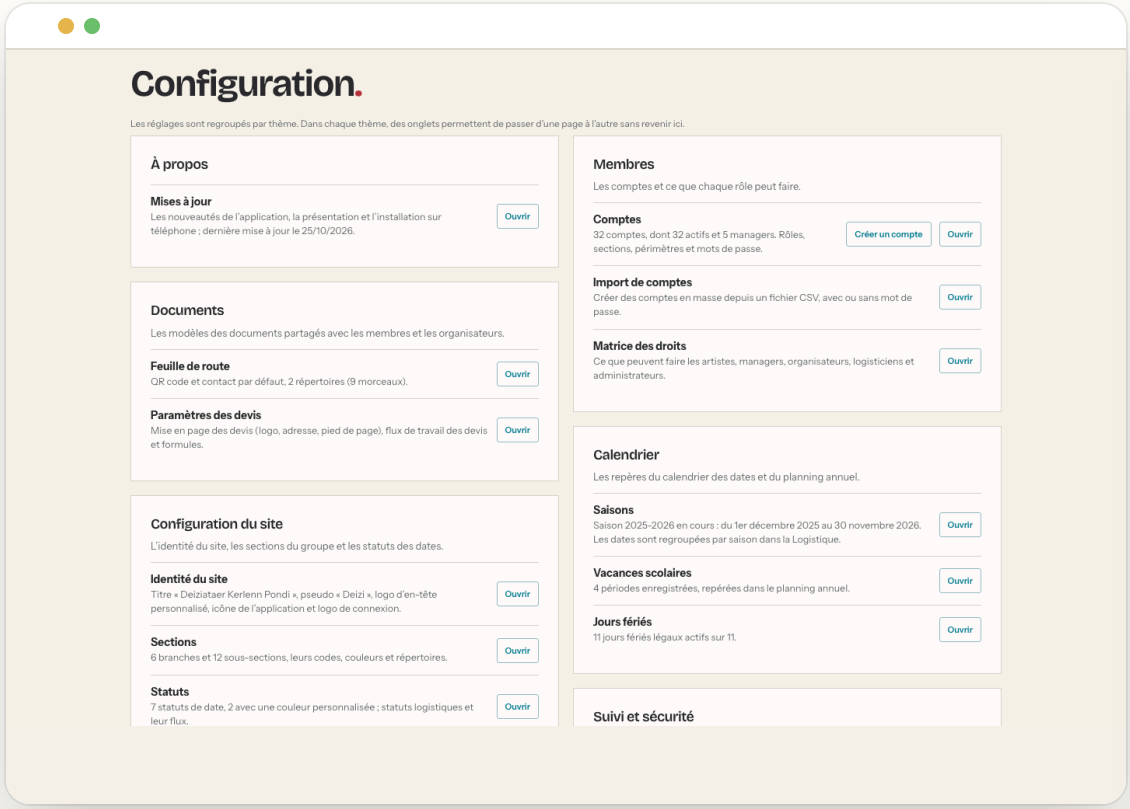

Configuring Deizi.

The settings that apply to everyone.

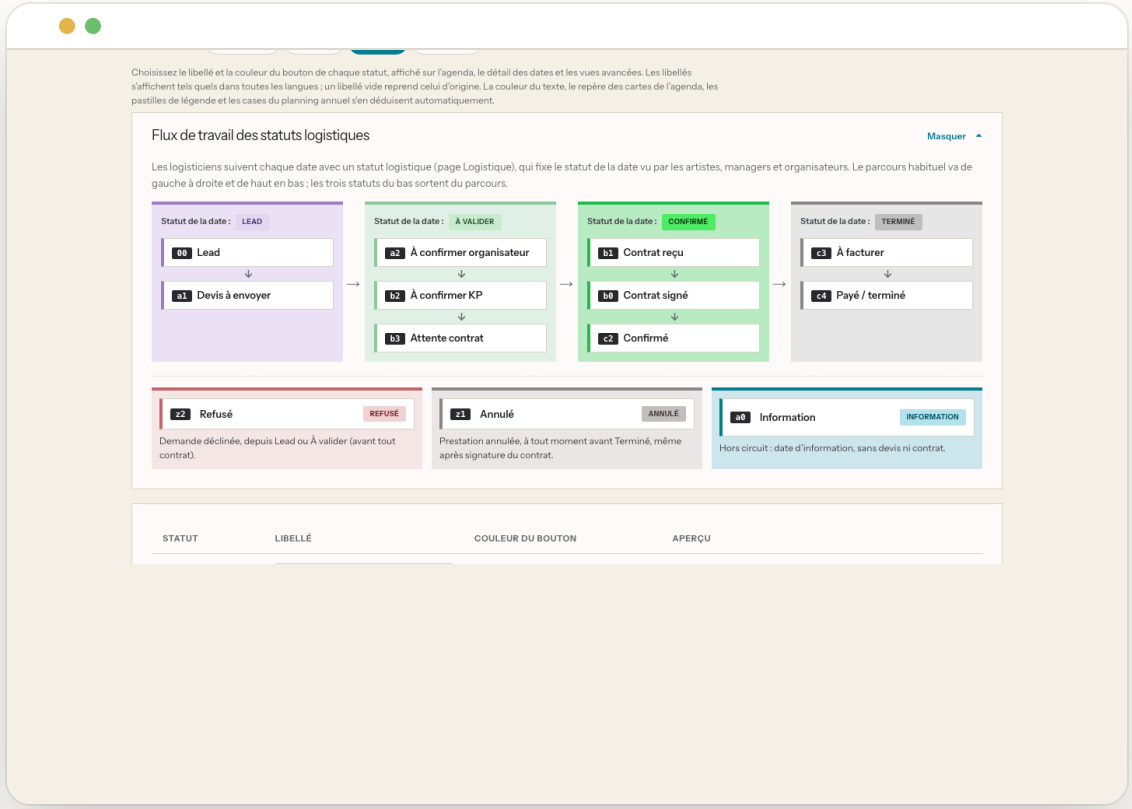

- Accounts and sections
- Statuses and workflow
- Site identity, seasons
- Languages and translations
- Rights matrix

Administrators

Settings.

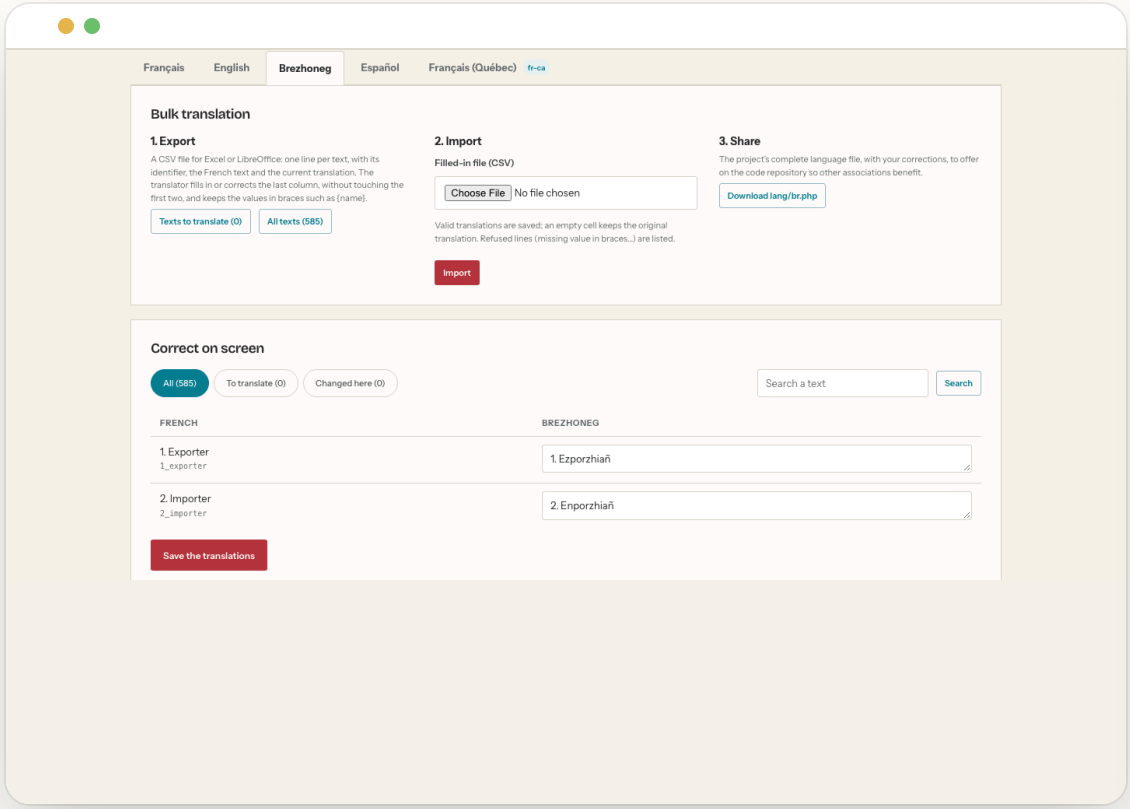

Settings by theme — calendar, site settings, members, documents, follow-up and security; in Sections, whether each one shows in the filters and the member directory.

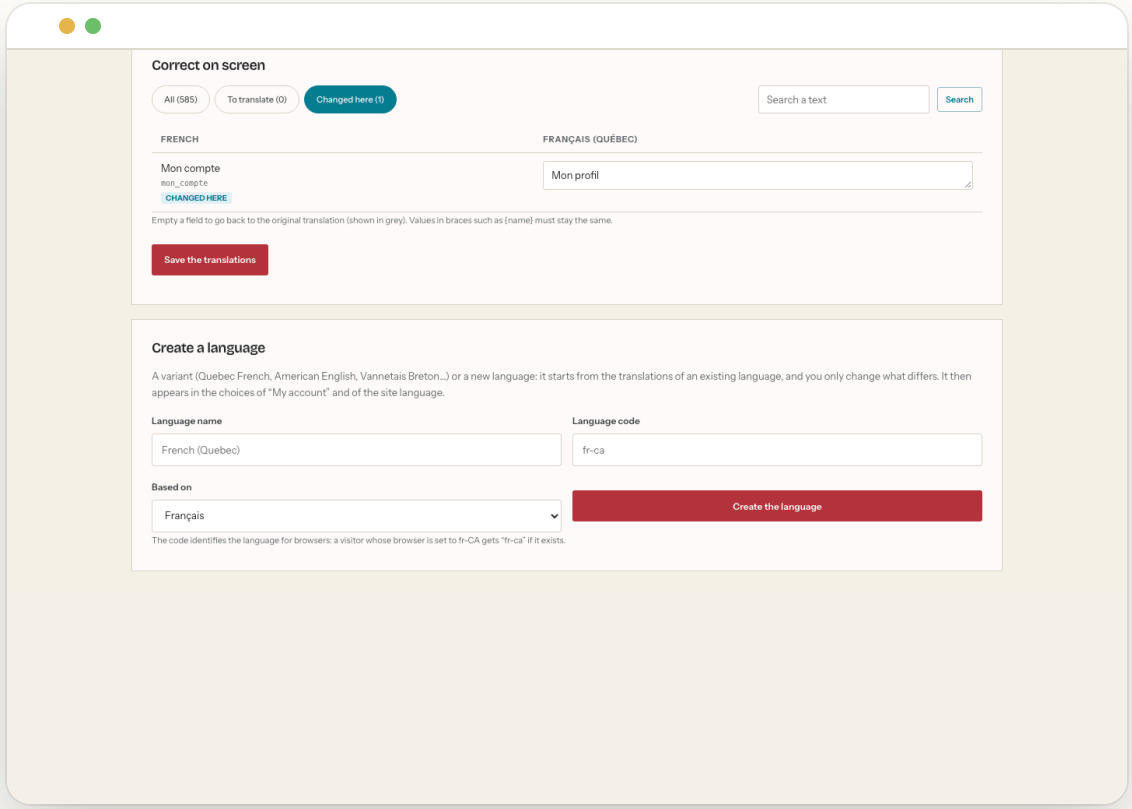

Statuses — names and colours chosen by the association (never translated), logistics statuses and their mapping, with the workflow diagram.

Administrators

Languages and translations.

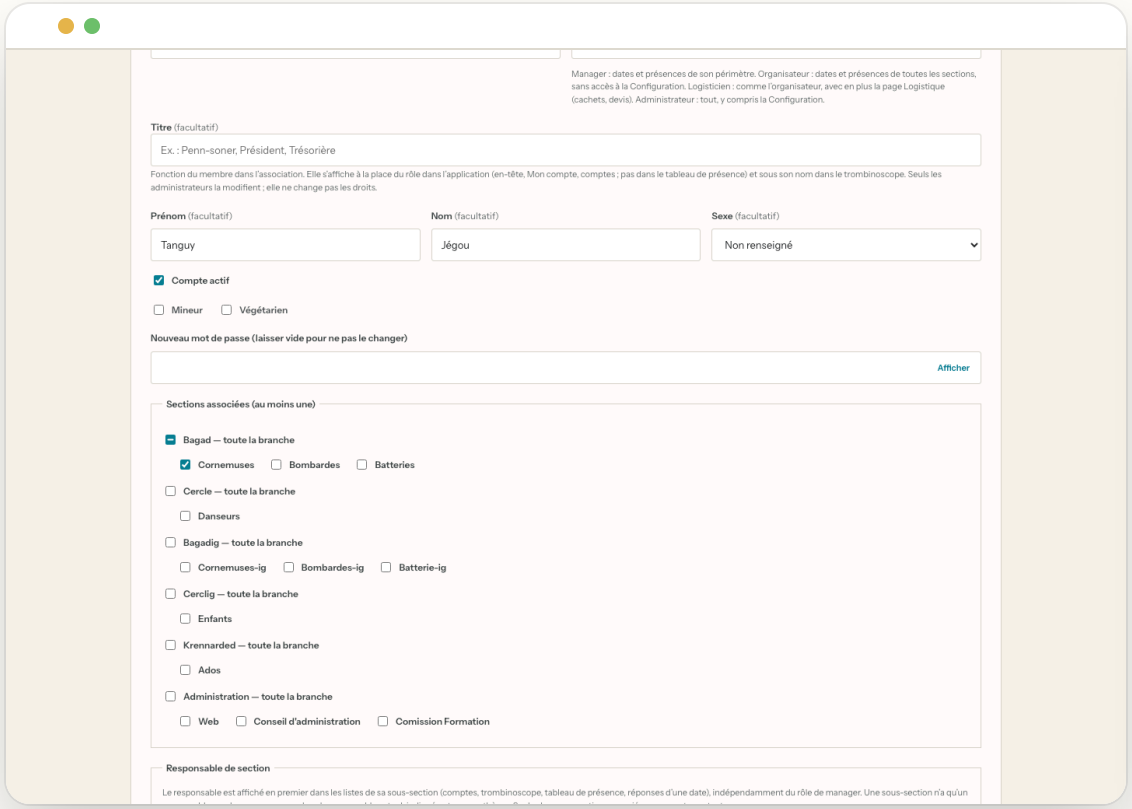

Correct or delegate — each text under its French version, to correct on screen; or a CSV file to hand to a translator, then import back.

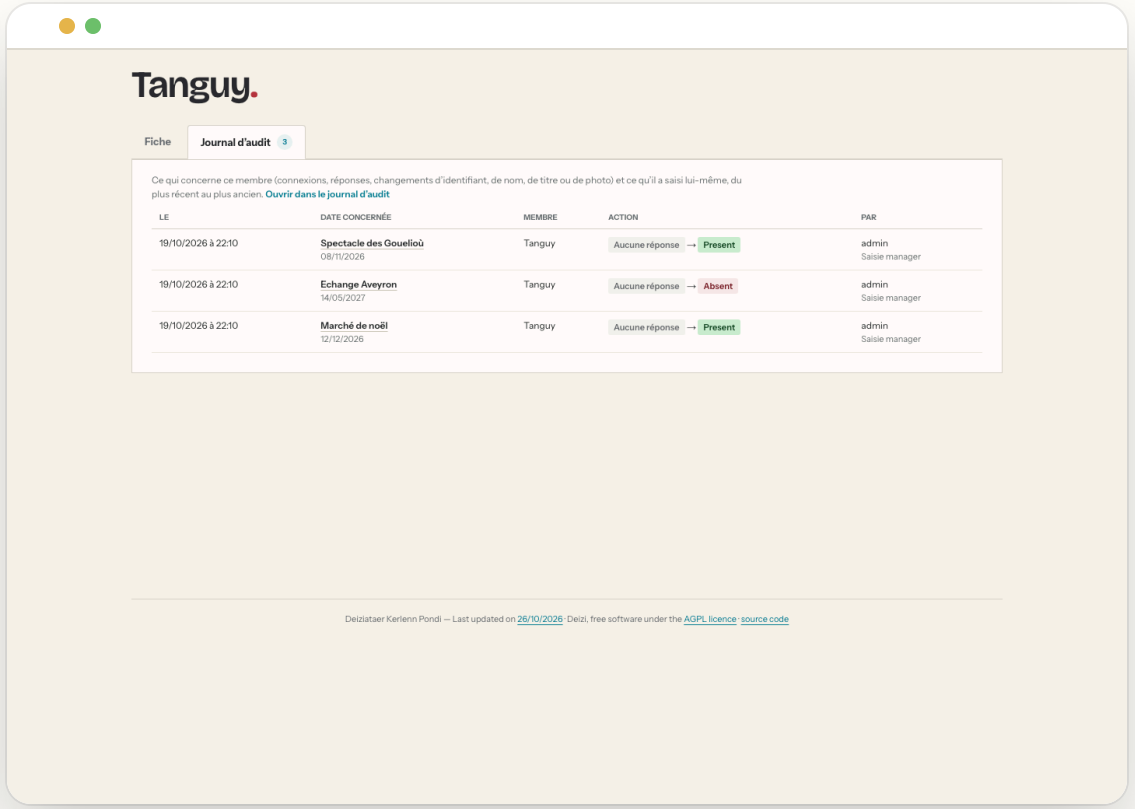

Create a language — a variant (Québec French, Vannetais Breton…) starts from an existing language: only what differs is changed.

Administrators

A member’s record.

Title and lead — the role in the association shown instead of the app role (“Président”); the section lead, first in their sub-section’s lists.

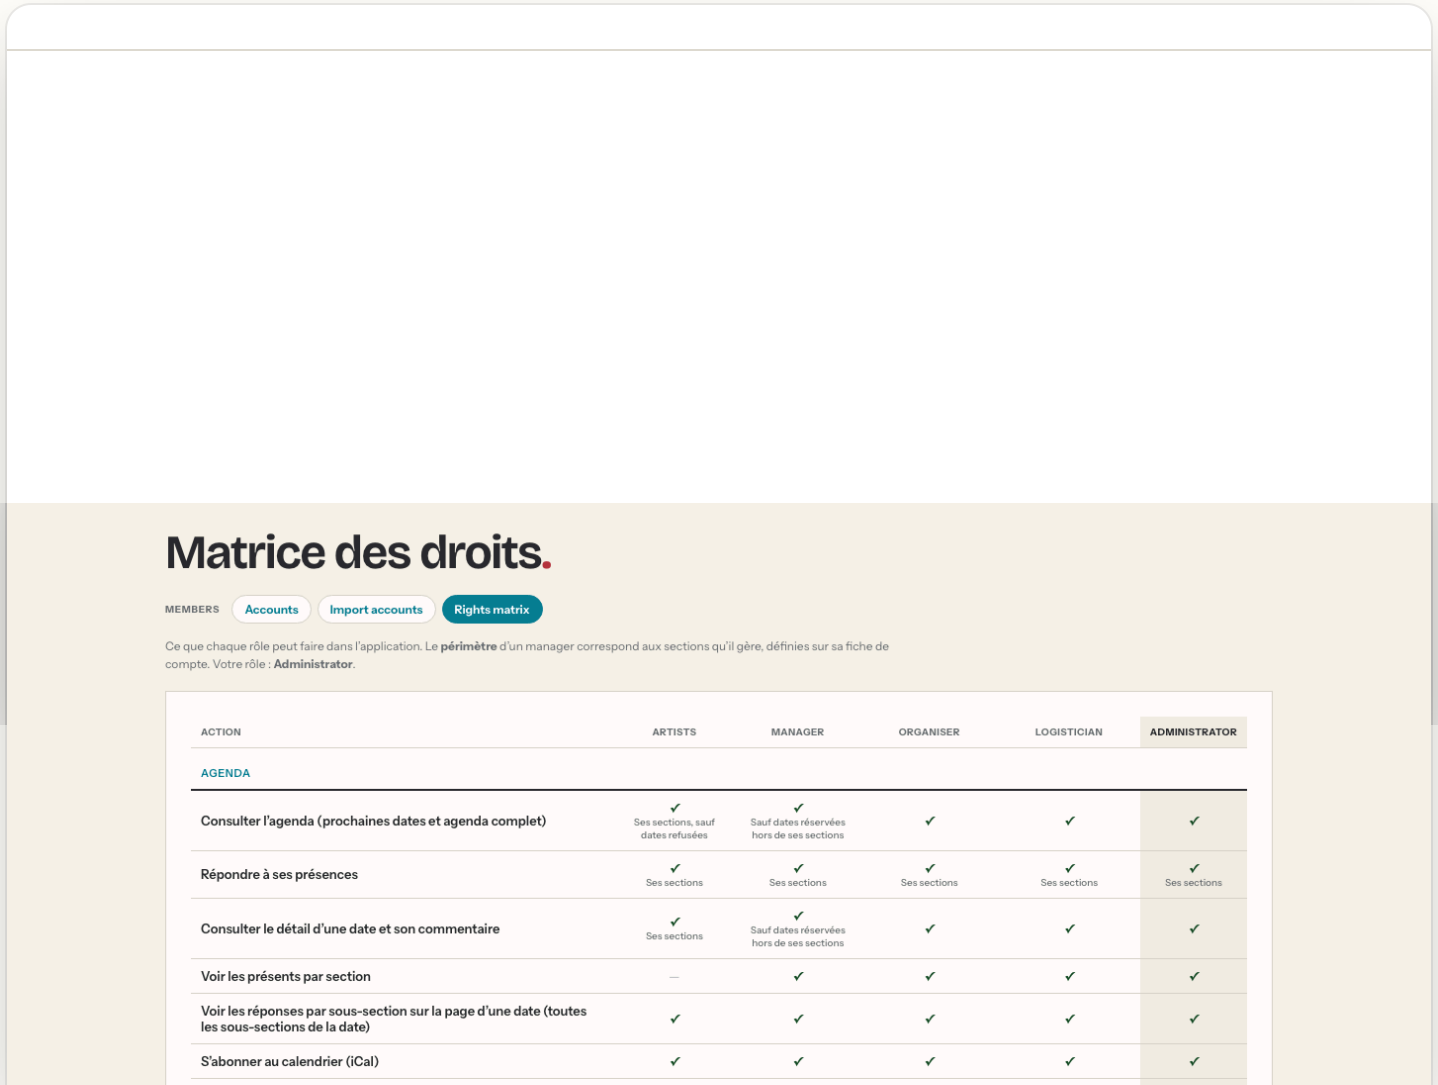

Audit log — a tab of the record: the member’s logins, answers and profile changes.

Administrators

Who can do what?

The rights matrix sums up, action by action, what each role allows. Managers, organisers, logisticians and administrators can open it.

Remember: when in doubt about a right, it is the reference.

Matrice des droits.

MEMBERS | Accounts | Import accounts | Rights matrix

Ce que chaque rôle peut faire dans l'application. Le **périmètre** d'un manager correspond aux sections qu'il gère, définies sur sa fiche de compte. Votre rôle : **Administrator**.

GETTING STARTED

Four steps this week.

1

Log in

With the login and password you received, then choose your language in “My account”.

2

Install

Add Deizi to your phone’s home screen.

3

Answer

Give your attendance for all the next dates.

4

Subscribe

Subscribe your phone with the calendar button (iCal): it stays up to date by itself.

A question, a forgotten password? Ask an organiser or an administrator. What’s new and this presentation are on the About page.

THANK YOU

Questions?

Find this presentation at any time in Deizi, on the About page.
